Product Highlights

UniSpend Anhydrous S is a sweetened, easy to use, anhydrous, plant-based oral suspension vehicle. UniSpend Anhydrous S utilizes medium chain triglycerides that have excellent oxidative stability and are preservative-free. UniSpend Anhydrous S is naturally sweetened and fortified with natural bitterness masking agent for optimal palatability. This unique oral suspension vehicle may be ideal for suspending active pharmaceutical ingredients that are known to be unstable in water, are lipophilic, or if the aqueous stability is unknown. Shake well prior to use.

- Innovative, anhydrous oral vehicle
- For use with APIs that are known to be unstable in water, lipophilic or if the aqueous stability is unknown
- Naturally sweetened with stevia, sugar-free
- Miscible with ethanol
- Water and oil miscible flavors can be used
- Caution should be taken when dispensing in syringes as the graduated markings on the exterior of the syringe will smear if product comes into contact with print

Ingredients

Medium chain triglycerides, Glyceryl distearate, Tryglycerol monooleate, Stevia, Natural flavors

Specifications
