Product Highlights

UniSpend Anhydrous is an elegant, easy to use, anhydrous plant-based oral suspension vehicle. This product utilizes medium chain triglycerides that have excellent oxidative stability and are preservative-free. UniSpend Anhydrous suspension vehicle is unsweetened and contains no dyes and has virtually no taste. UniSpend Anhydrous may be ideal for suspending active pharmaceutical ingredients that are known to be unstable in water, are lipophilic, or if the aqueous stability is unknown. Shake well prior to use.

- Innovative, anhydrous oral vehicle
- For use with APIs that are known to be unstable in water, lipophilic or if the aqueous stability is unknown
- Unsweetened and unflavored
- Miscible with ethanol
- Water and oil miscible flavors can be used
- Caution should be taken when dispensing in syringes as the graduated markings on the exterior of the syringe will smear if product comes into contact with print

Ingredients

Medium Chain Triglycerides, Glyceryl Distearate, Triglycerol Monooleate

Specifications
