Phytobase

Phytobase cream base is an oil-in-water, off-white vanishing cream with an oil phase containing natural oil bodies called phytosomes. It uses natural emulsifiers for a light feel, making it an ideal face and body cream for most skin types. Phytosomes contain known liposomal transdermal penetration enhancers for systemic delivery of active pharmaceutical ingredients (APIs) when applied to normal skin. All oils included in Phytobase are from plant sources. This product is free from fragrances, dyes, parabens, mineral oil, SLs, propylene glycol and 1,4-dioxane and is gently preserved.

Vulvodynia:

- FA-22870** Gabapentin 6% Vaginal Cream (Phytobase)
FA-11175 Amitriptyline HCl 2% - Baclofen 2% Vaginal Cream (Emollient)
