697371 – 500 gm

697325 – 4.5 kg

697324 – 18 kg

Applications

Dermatology

Pain

Veterinary

API Load

High (~30%)

Compatible Solvents

Dimethyl Sulfoxide

Diethylene Glycol
Monoethyl Ether

Glycerin

Propanediol

Propylene Glycol

Product Highlights

PENCream is an elegant oil-in-water vanishing cream compounding base formulated for enhanced transdermal penetration. This elegant alternative to PLO, with added emollients, provides a better rub-in and longer-lasting moisturization without irritation. PENCream is highly compatible with a diverse range of hydrophilic and lipophilic active ingredients, has a high API load capacity and is ideal for hybrid formulations.

- Enhanced transdermal penetration ability
- Hydrophilic and lipophilic API compatibility
- Applies easy with no sticky residue
- Cosmetically elegant formulation provides long-lasting moisturization

Ingredients

Purified water, isopropyl palmitate, caprylic/capric triglyceride, propylene glycol, cetareth-20, cetaryl alcohol, glyceryl stearate, PEG-100 stearate, dimethicone, octyldodecanol, hydroxyethyl acrylate/sodium acryloyldimethyl taurate copolymer, lecithin, phenoxyethanol, ethylhexylglycerin, trolamine

Specifications

PENCream is a white heavy O/W cream emulsion

- pH: 7.0
- Specific Gravity: 0.96 g/mL
- Viscosity: 200,000 – 350,000 cps

Formulas

#FA02203 Atenolol 6.25 mg/0.1 mL Cream in PENCream

#FA02202 Methimazole 5 mg/0.1 mL Cream in PENCream
