

FLAVOR VEHICLE FAMILY

Full range of oral suspending and flavoring vehicles

The Flavor family offers a full range of oral suspending and flavoring vehicles for compounding, from flavor-free suspending bases to ready-flavored cherry syrups. Each option is buffered to a stable, slightly acidic pH and formulated to incorporate medicated powders or crushed tablets into smooth, consistent oral suspensions. Choose the vehicle — or combination — that best fits your formulation and patient needs, from sugar-free to full-flavor options.

HIGHLIGHTS

- **Broad API compatibility** — supports hydrophilic, acid-stable, and hydrophobic actives across the line, incorporating virtually all medicated powders or crushed tablets
- **Formulated for stability** — each vehicle is buffered to a consistent, slightly acidic pH (4.0–5.5 range) for dependable, uniform suspensions
- **Sugar-free options available** — Flavor Plus and Flavor Sweet SF offer sugar-free formulations for diabetic or sugar-restricted patients
- **Preserved for reliability** — contains suitable preservatives to maintain product integrity and consistency over time
- **Trusted across patient populations** — suited for suspensions, pediatrics, and geriatrics, wherever palatability and ease of administration matter

SAMPLE FORMULAS

- FA-24543** – Propranolol HCl 1mg/mL Oral Suspension (Flavor Sweet SF)(Flavor Plus)(BUD Study)
- FA-24543** – Propranolol HCl 1mg/mL Oral Suspension (Flavor Sweet SF)(Flavor Plus)(BUD Study)
- FA-24503** – Lidocaine HCl 10% - Prilocaine HCl 10% - Tetracaine HCl 4% Dental Gel (Flavor Sweet SF)

Extended BUD Studies

Flavor Plus and Flavor Sweet offer formulations with up to 90-day BUD.

Built for Flexibility

Sugar-free, flavor-free, or pre-flavored — mix and match to fit any formulation.
