

SYRSPEND® SF

Ready-to-Use Suspending Vehicle

SyrSpend® SF is a ready-to-use, all-in-one suspending and sweetening vehicle for the preparation of oral liquid dosage forms. Buffered to pH 4.2 with low osmolality (<50 mOsmol/kg), it's compatible with an extensive range of APIs and delivers a pleasant, sweet taste patients readily accept. Available in a neutral Unflavored option or a patient-friendly Cherry flavor, it simplifies compounding across both formats.

HIGHLIGHTS

- **Pleasant, Patient-Friendly Taste** — Formulated to taste-mask actives with a sweet flavor profile that improves patient acceptance and compliance.
- **Two Flavor Options** — Available Unflavored for neutral applications or in Cherry for enhanced palatability, especially with pediatric and geriatric patients.
- **Broad API Compatibility** — Formulated to work with an extensive range of active pharmaceutical ingredients.
- **Backed by Published Stability Data** — Supported by a stability study covering over 45 active pharmaceutical ingredients compounded in SyrSpend SF.

SAMPLE FORMULAS

- FA-24162** – Famotidine 8mg/mL Oral Suspension (SyrSpend SF) (BUD Study)
- FA-24161** – Cyanocobalamin 0.2mg/mL Oral Suspension (SyrSpend SF) (BUD Study)
- FA-22565** – Tacrolimus 1 mg/mL Oral Suspension (SyrSpend® SF)(BUD Study)
- FA-21172** – Ondansetron 0.8 mg/mL Oral Suspension (SyrSpend SF)(BUD Study)

BUD Studies

Stability studies for extended dating are available for over 45 APIs.

Broad API Compatibility

Formulated to work with an extensive range of active pharmaceutical ingredients.

Time-saving

An all-in-one suspending and sweetening liquid vehicle that requires no additional prep.
