

TRICHOSOL™

Alcohol-Free Hydrophilic Solution

TrichoSol™ is a highly spreadable hydrophilic solution containing mineral salts of vegetable origin, free from alcohol and propylene glycol. It has proven to be an ideal, stable vehicle for application of minoxidil base up to 7%. Featuring patented TrichoTech™ technology, it maximizes prescription results through physiological improvement of the cellular environment.

HIGHLIGHTS

- **Highly Spreadable Formula** — Delivers smooth, even coverage for a comfortable application experience.
- **Broad Ingredient Compatibility** — Compatible with both hydrosoluble and liposoluble active ingredients, supporting a range of formulations.
- **Vegetable-Derived Mineral Salts** — Built on mineral salts of vegetable origin for a naturally derived formulation base.
- **Avoids Typical Scalp Dehydration** — Does not cause the dehydration commonly associated with hydroalcoholic lotions.
- **Backed by Published Compatibility Data** — Supported by a stability study evaluating multiple APIs — including minoxidil, dutasteride, and latanoprost — in TrichoConcept™ vehicles.

SAMPLE FORMULAS

- FA-24433** – Minoxidil 7% - Ketoconazole 2% Topical Solution (TrichoSol™)(BUD Study)
- FA-24080** – Minoxidil 10% - Fluocinolone Acetonide 0.01% - Finasteride 0.25% Topical Solution (TrichoSol™)(BUD Study)
- FA-24011** – Cetirizine HCl 0.5% Topical Solution (TrichoSol)(BUD Study)

BUD Studies

Studies supporting extended beyond use dating up to 180 days are available.

Alcohol & Propylene Glycol-Free

Formulated without alcohol or propylene glycol, avoiding the typical dehydration seen with hydroalcoholic lotions.

Gentle on the Scalp

A delicate hydrophilic solution that's gentle to the scalp with minimal irritation.
