

PHYTOBASE™

Natural Gel Cream

Phytobase™ is a natural, ultra-light, hydrophilic gel cream formulated with vitamin E and plant-derived oil bodies known as phytosomes for unique antioxidant and skin-moisturizing properties. It's an elegant, non-greasy vehicle suited for both prescription compounding and basic skin care, ideal for oily and balanced skin types, with 180-day BUD studies supporting extended dating for hormone formulations.

HIGHLIGHTS

- **Mid API load, up to 20%** — compatible with a broad range of APIs, including estradiol, estriol, estrone, progesterone, and testosterone
- **Phytosome-rich formulation** — high concentrations of triglycerides from linoleic and oleic acids support antioxidant and moisturizing benefits
- **Formulated without common irritants** — free of fragrances, dyes, parabens, mineral oil, SLS, propylene glycol, and 1,4-dioxane
- **Versatile applications** — suited for dermatology, cosmeceutical care, age management, and HRT
- **Dermatologically and clinically tested** — demonstrated not to produce clinical signs of irritation or discomfort in participants and found to be non-comedogenic and non-acnegenic per the Acne Lesions Assessment.

SAMPLE FORMULAS

- FA-23900** – Estriol 1.6mg - Estradiol 0.4mg (Biest 2mg/g (80:20))- Progesterone 80mg - Testosterone 10mg/g Cream (Phytobase®)(BUD Study)
