

HRT HEAVY™

Hormone Replacement Therapy Cream

HRT Heavy™ sets the standard for hormone restoration compounding — a cosmetically elegant, non-oily cream engineered for deep transdermal delivery and a luxuriously smooth finish. Backed by 180-day BUD studies from independent, third-party testing, it gives pharmacists a trusted, high-performance vehicle for their most demanding male and female HRT formulations.

HIGHLIGHTS

- **Backed by extensive stability data** — one of the most thoroughly studied HRT cream bases on the market
- **Moderate carrying capacity** – maximum API load up to 20%, compatible with estradiol, estriol, estrone, progesterone, testosterone, and DHEA
- **Broad solvent compatibility** – almond oil, diethylene glycol monoethyl ether, glycerin, propylene glycol, and propanediol
- **Formulated for topical and vaginal use** — versatile enough for both transdermal and intravaginal HRT preparations

SAMPLE FORMULAS
