

CARBOMER GEL AQUEOUS

Elegant Water-Based Gel

Carbomer Gel Aqueous is an elegant, ready-to-use gel base ideally suited for dermatological and cosmetic applications. Its water-soluble system allows neutral to alkaline active ingredients to be easily incorporated, forming a translucent, quick-drying hydrogel. Built on Carbomer, a natural single-phase gelling system, it offers broad utility across dermatology, pain, dental, and phonophoresis applications.

HIGHLIGHTS

- **Water-Based Formula** — Built on a purified water base, making it easy to incorporate water-soluble actives.
- **Clear Gel Appearance** — Translucent, semisolid consistency gives a clean, cosmetically elegant look and feel.
- **Ready-to-Use Vehicle** — Requires no additional prep, streamlining the compounding process.
- **Natural Single-Phase Gelling System** — Utilizes Carbomer, a naturally derived gelling agent, for consistent structure and stability.
- **Broad Application Range** — Suited for dermatology, cosmetic, HRT, pain, dental, ultrasound gel, and phonophoresis uses.

SAMPLE FORMULAS

FA-13350 – Ketorolac Tromethamine 2% Gel (Carbomer Gel Aqueous)
FA-13275 – Testosterone 1% Topical Gel (Carbomer Gel Aqueous)
FA-24017 – Hydrocortisone 10% Phonophoresis Gel (Carbomer Gel - Aqueous) (PM140)

Quick-Drying

Sets rapidly for a fast, convenient application experience.

Non-Greasy

Absorbs cleanly with no oily or heavy residue left behind.

Non-Film Forming

Leaves no visible film on the skin after application.
