

DILUTAB OD SL

Fast-Melt Tablet Excipient

DiluTab OD SL is a ready-to-use excipient specifically developed for compounding orodispersible and sublingual tablets using direct compression. It rapidly disintegrates in the oral cavity, making administration easier for pediatric, geriatric, and dysphagic patients. Naturally sweetened and flavored for enhanced palatability, DiluTab OD SL also supports transmucosal absorption in sublingual formulations for a faster onset of action while helping bypass first-pass metabolism.

HIGHLIGHTS

- **Rapid Disintegration** – Designed to disintegrate in less than 60 seconds, supporting convenient administration without water.
- **Dual Functionality** – Suitable for both orodispersible and sublingual tablet formulations from a single excipient platform.
- **Enhanced Patient Compliance** – Pleasant mouthfeel with natural sweeteners and flavoring helps improve acceptance and adherence.
- **Supports Faster Absorption** – Promotes mucosal permeation of active ingredients for sublingual applications.
- **Clean Label Profile** – Free from gluten, lactose, soy, peanuts, sugar, GMOs, and animal-derived ingredients.

Why DiluTab OD SL?

DiluTab OD SL delivers the performance of a modern orally disintegrating excipient in a convenient direct-compression format. Engineered for rapid tablet disintegration and enhanced palatability, it helps pharmacies create differentiated dosage forms that support compliance and patient satisfaction. Its versatility for both orodispersible and sublingual applications makes it an ideal solution for personalized medicine.

Rapid Disintegration

Disintegrates in under 60 seconds, helping create fast-melt tablets that can be taken without water.

Patient-Friendly Delivery

Ideal for patients who have difficulty swallowing traditional tablets, including pediatric, elderly, and dysphagic populations.

Sublingual Performance

Supports transmucosal absorption and may help bypass first-pass metabolism
