

EMOLLIENT CREAM

Heavy O/W Cream Base

Emollient Cream is a heavy oil-in-water (O/W) emulsion base formulated for a wide range of pharmaceutical and cosmetic applications. Its smooth, non-irritating texture delivers excellent slip with no sticky residue, making it a versatile vehicle for topical, vaginal, and rectal preparations. Emollient Cream supports API loads of up to 20%, giving compounders flexibility across a broad range of formulations.

HIGHLIGHTS

- **Versatile Application** — Suitable for topical, vaginal, or rectal use, making it a flexible base for a wide variety of compounded preparations.
- **Water Washable** — Rinses cleanly from skin and fabric without leaving behind a heavy or tacky film.
- **Non-Occlusive** — Allows the skin to breathe naturally, making it well suited for everyday and long-term use.
- **Non-Greasy Finish** — Absorbs smoothly with a light, comfortable after-feel and no sticky residue.
- **Mid-Level API Load** — Accommodates active pharmaceutical ingredient loading of up to 20%, supporting a broad range of compounding needs.

SAMPLE FORMULAS

- FA-24249** — Nifedipine 0.5% - Lidocaine HCl 5% - Hydrocortisone 2.5% Rectal Cream (Emollient Cream)
- FA-13102** — Estradiol 25 mcg/mL (0.025 mg/mL) Vaginal Cream (Emollient)
- FA-12857** — Pramoxine HCl 1% - Hydrocortisone Acetate 1% Cream (Emollient)

Paraben-Free

Formulated without parabens, a common preservative class some patients prefer to avoid.

Fragrance-Free

Contains no added fragrance, reducing the risk of irritation for sensitive-skin patients..

Dye-free

Free of added colorants, keeping the base clean and predictable for custom formulations.
