

MEDIUM CREAM

Multi-Purpose Cream Base

Medium Cream is a fast-absorbing oil-in-water (O/W) emulsion base with emollient properties, designed as a multi-purpose delivery vehicle for hormones, steroids, and a wide range of other active ingredients. Non-ionic and ester-free, it offers a high-end feel and excellent slip that enhances the finish of compounded preparations. Its medium viscosity and consistent performance make it a reliable base across dermatology, HRT, pediatric, and veterinary applications.

HIGHLIGHTS

- **Fast Absorbing** — Delivers a rapid absorption profile that leaves skin feeling smooth without a heavy or lingering residue.
- **Versatile Application** — Suitable for topical, vaginal, or rectal use, making it adaptable across a broad range of compounded preparations.
- **Water Washable** — Rinses cleanly from skin and fabric without leaving behind a tacky film.
- **Non-Greasy Finish** — Absorbs smoothly with a light, comfortable after-feel.
- **Non-Ionic & Ester-Free** — A gentler chemical profile that supports broad compatibility with a wide range of active ingredients.

SAMPLE FORMULAS

- FA-12525** – Tretinoin 0.1% Cream (Medium Cream)
FA-13088 – Spironolactone 5% Cream (Medium Cream)
FA-12663 – Clioquinol 3% - Hydrocortisone 1% Cream (Medium Cream)
FA-12505 – Cholecalciferol 100,000 U/g Cream (Medium Cream)

Paraben-Free

Formulated without parabens, a common preservative class some patients prefer to avoid.

Fragrance-Free

Contains no added fragrance, reducing the risk of irritation for sensitive-skin patients.

Dye-free

Free of added colorants, keeping the base clean and predictable for custom formulations.
