

OCCLUVAN™

Hydrophilic Ointment

Occluvan™ is a hydrophilic ointment base with a unique, innovative formulation that provides both occlusion and hydration effects. It's a versatile, preservative-free compounding vehicle for a broad range of lipophilic and hydrophilic APIs and is ideal for very dehydrated and affected skin. Its unique water-absorbing property enhances permeation of ingredients into deeper skin layers, supporting both prescription compounding and everyday skin care needs.

HIGHLIGHTS

- **Broad API compatibility** — accommodates a wide range of lipophilic and hydrophilic actives, including clobetasol propionate, zinc oxide, and tacrolimus
- **Easy spreadability** — protective ointment base designed for improved patient comfort
- **Formulated without common irritants** — free of fragrances, dyes, parabens, mineral oils, SLS, propylene glycol, ethoxylates, and 1,4-dioxane
- **Suited for very dehydrated and affected skin** — enhances permeation of ingredients into deeper skin layers
- **Dermatologically and clinically tested** — demonstrated not to produce clinical signs of irritation or discomfort in participants and found to be non-comedogenic and non-acnegenic per the Acne Lesions Assessment.

SAMPLE FORMULAS

- FA-23966** – Nifedipine 0.2% - Lidocaine 5% Rectal Ointment (Occluvan)
