PENTRAVAN® PLUS

Transdermal Cream Base

Pentravan® Plus Cream Base is a higher-viscosity, liposomal vanishing cream that builds on the original Pentravan® technology with added emulsifiers for greater compounding flexibility. It supports API loads up to 30%, making it well suited for complex, multi-drug transdermal formulations. The cream absorbs quickly and completely, leaving no greasy or sticky residue behind.

HIGHLIGHTS

- **High API Load —** Supports up to 30% concentration of actives and solvents, enabling complex, multi-drug formulations.
- **Broad Compatibility —** Works with a wide range of APIs and common compounding solvents, including almond oil, propylene glycol, and glycerin.
- **Simple Compounding —** Ready-to-use, three-step process that saves time versus weighing and mixing multiple ingredients.
- **Elegant Skin Feel —** Non-greasy, fast-vanishing cream that leaves no sticky residue.
- **Individualized Dosing —** Supports precise, patient-specific formulations across pain, HRT, dermatology, hospice, and veterinary applications.

SAMPLE FORMULAS

FA-24232 – Diclofenac Sodium 1% - Gabapentin 6% - Lidocaine 5% Cream (Pentravan Plus)
FA-24198 – Promethazine HCl 25 mg/mL Cream (Pentravan® Plus)
FA-24201 – Sertraline 4mg/0.1 g Cream (Pentravan® Plus)
FA-23181 – Tadalafil 2% Cream (Pentravan® Plus)
FA-23059 – Ketoprofen 20% - Gabapentin 10% - Baclofen 2% - Cyclobenzaprine HCl 2% - Lidocaine 2% Cream (Pentravan® Plus)

High-Capacity Loading

Holds up to 30% API concentration, ideal for multi-ingredient formulas.

Fast-Absorbing Formula

Non-greasy, vanishing cream that penetrates without residue.

Dermatologically and Clinically Tested

Demonstrated not to produce clinical signs of irritation or discomfort in participants
