

SALTSTABLE LS ADVANCED™

Transdermal Pain Management Cream

SaltStable LS Advanced™ is a next-generation transdermal cream base that delivers a smooth, dry-touch finish without sacrificing performance, durability, or versatility. It supports all active ingredient classes regardless of salt form, with superior capacity for multiple APIs in one formulation. Its self-stabilizing composition ensures long-term stability with no added emulsifiers required.

HIGHLIGHTS

- **Versatile applications** – suited for pain management, veterinary medicine, and sports medicine use cases
- **Broad API compatibility** – 30% hydrophilic and 40% lipophilic compatibility, supporting a wide range of active types
- **High-capacity active loading** – validated in vitro for up to 8 actives in one formulation, with a total API load of 40%.
- **Silogel-based formula** – a silicone-based organogel delivering a smooth, dry-touch feel that's less sticky and less tacky than typical cream bases.

SAMPLE FORMULAS

- FA-24228** – Ketoprofen 10% - Gabapentin 6% - Baclofen 2% - Lidocaine 2% Cream
- FA-24049** – Diclofenac Sodium 5% - Lidocaine 3% Cream
- FA-24216** – Naltrexone HCl 10% Cream
- FA-24225** – Sumatriptan 5% - Ketamine 2.5% - Flurbiprofen 10% - Cyclobenzaprine HCl 3% Cream
- FA-24204** – Flurbiprofen 10% - Amantadine HCl 8% - Gabapentin 4% - Pentoxifylline 3% - Bupivacaine HCl 2% - Cyclobenzaprine HCl 2% Cream

High API loads

Validated for up to 8 APIs in a single formulation, ideal for complex compounds.

Universal compatibility

Works with all actives regardless of salt form, so no reformulating needed across products.

Time-saving

No wetting or thickening agents required, and it stays stable long-term without added emulsifiers
