

SYRSPEND® SF PH4 DRY

Pre-Measured Suspending Base

SyrSpend® SF PH4 Dry is a pre-measured, preservative-free suspending base for reconstitution, designed to compound elegant oral liquid dosage forms with a pleasant taste. It's buffered to pH 4.2 with low osmolality (<50 mOsmol/kg), making it gastrointestinal-friendly and appropriate for vulnerable patient populations. Its validated, graduated dispensing container enables an easy compounding process for accurate, individualized dosing.

HIGHLIGHTS

- **Simplified Three-Step Compounding** — Reconstitutes directly in a validated, graduated dispensing container for a fast, streamlined process.
- **Individualized, Accurate Dosing** — Active suspending technology stabilizes the suspension at rest and prevents caking, supporting more precise, personalized therapy.
- **Customizable Flavoring** — Personalized flavoring can be added while maintaining a pleasant taste even when unflavored.
- **Established Shelf Life & Stability** — 36-month shelf life unopened (12 months once opened), stored at 15–25°C, with broad compatibility across active pharmaceutical ingredients.

SAMPLE FORMULAS

- FA-24185** – Cephalexin 50mg/mL Oral Suspension (SyrSpend SF PH4)(BUD Study)
- FA-24160** – Azithromycin 40mg/mL Oral Suspension (SyrSpend SF PH4 Dry)(BUD Study)
- FA-22253** – Metronidazole Benzoate 40 mg/g Mucosal Paste (SyrSpend SF PH4 Dry)

Gastrointestinal-Friendly

Low osmolality (<50 mOsmol/kg) supports gentle GI tolerance.

Specially Formulated

Free of sugars, alcohol, and gluten, broadening its suitability across sensitive patient populations.

Preservative-Free

Free of preservatives, colourants, and sorbitol, making it appropriate for use in vulnerable patient groups.
