

VERSAPLUS™ & VERSAFREE™

Oral Liquid Compounding Vehicles

Versa Plus™ and Versa Free™ are complementary oral liquid vehicles designed to simplify compounded suspension formulations while addressing the needs of sensitive patient populations. Versa Plus™ functions as a flavor-free suspension vehicle, while Versa Free™ serves as a flavor-free, sugar-free syrup vehicle that enhances palatability and mouthfeel. Together, they can be used individually or combined to create customized oral suspensions for patients.

HIGHLIGHTS

- **Designed for Sensitive Patients** – Free from dyes, parabens, gluten, sugar, flavors, and saccharin, helping minimize exposure to common allergens and irritants.
- **Flexible Formulation System** – Use Versa Plus™ alone, Versa Free™ alone, or combine them to achieve the desired suspension characteristics and taste profile.
- **Virtually No Aftertaste** – Flavor-free formulations help support patient acceptance and customization options.
- **Natural Ingredients & Preservatives** – Formulated with naturally derived components and preservative systems suitable for compounded oral liquids.
- **Ideal for Pediatric & Geriatric Use** – Designed to support compounded oral medications for patients who require liquid dosage forms.

WHY THE VERSA LINE™?

Create better oral suspensions with a vehicle system designed around both patient needs and compounding efficiency. Versa Plus™ and Versa Free™ provide the flexibility to optimize viscosity, suspension stability, and palatability. The result is a versatile oral liquid platform that supports consistent formulations and improved patient acceptance across a wide range of compounded therapies.

Suspension & Syrup System

Versa Plus provides reliable suspension properties, while Versa Free offers a palatable syrup base for customized oral formulations.

Patient-Friendly Vehicle

Well suited for pediatric, geriatric, diabetic, and allergy-sensitive patients who require customized oral medications.
