

Palette in action

At Spectro Cloud we help organizations of all shapes and sizes turn Kubernetes challenges into business value. How can we help you?

RAPIDAI

RapidAI scales when downtime is unthinkable

RapidAI is on a mission to save lives by deploying its innovative healthcare imaging technology, which detects strokes and embolisms, to 2k+ hospitals, with 30%+ growth in scans each year.

It uses Spectro Cloud Palette to deploy, secure and manage edge Kubernetes infrastructure to support this groundbreaking workload at scale, without worrying about downtime.

GE HealthCare

GEHC automates from cloud to edge

GE HealthCare operates across 5,000 hospitals in 160 countries. It chose Spectro Cloud Palette to provide a complete, automated lifecycle management solution for all its Kubernetes clusters in AWS EKS, on-premises data centers and the edge.

Palette delivers 90% faster upgrades for superior service levels and gives GEHC the cross-platform control and agility it needs to push the limits of medical innovation – all while saving \$18 million in field operating costs.

Dentsply Sirona makes edge painless

Dentsply's dental scanners are used in thousands of clinics, with each product an edge Kubernetes cluster.

Dentsply chose Spectro Cloud to make this scale work, enabling zero touch onboarding for sites with no technical staff, eliminating downtime, and meeting strict security and compliance requirements for sensitive data. The result? Smiles all round.

Yum! Brands: building the restaurant of the future

Yum operates thousands of restaurant sites around the globe, and knows that the right edge infrastructure is essential to keep cost under control and deliver the right customer experience.

It chose Spectro Cloud for seamless, uninterrupted cluster management from edge to cloud, at truly global scale.

CompuGroup Medical drives innovation with K8s and DeARX iPaaS

With a rich history spanning decades, healthcare technology provider CompuGroup Medical (CGMSA) has become synonymous with cutting-edge solutions that elevate the healthcare sector.

To help it take the next step on its cloud-native journey, CGMSA turns to DeARX's managed Kubernetes integration service, iPaaS. Spectro Cloud and DeARX together enabled CGMSA to transition its entire integration landscape into K8s in just two months.

T-Mobile trusts Palette for mission-critical K8s at scale

T-Mobile USA runs more than 200 K8s clusters with Palette, across mission-critical virtualized and bare metal on-prem environments.

With Palette, deploying a new cluster has gone from weeks to hours, giving T-Mobile's platform teams automated, simplified operations. What's more, its team of over 5,000 developers is empowered to work on thousands of mission-critical apps with greater velocity, choice, and control.

Snackpass supports quick-serve restaurants with EKS efficiency

Snackpass has built a modern point of sale app suite for restaurants.

When migrating from a legacy platform, Snackpass chose Palette to build brand new full-stack dev, test and prod clusters in EKS, with autoscaling and automation for quick expansion, high availability and low cost. The migration incurred zero downtime and Snackpass is saving 50% in TCO.

Shibuya drives sovereign IT innovation with Spectro

Shibuya is a Swedish MSP that's on a mission to deliver secure, sovereign IT for the Nordics. It chose Palette to power its bare metal data center modernization.

Only Spectro Cloud could offer the strong isolation, self-hosted sovereignty and true operational efficiency at scale that the Shibuya team needed to build the next generation of services for its customers.

Whatever your use case, we have a solution to fit

Beyond the stories you've read above, we're working with dozens of Kubernetes pioneers to achieve their goals. So whether you're in AWS or the edge, oil and gas or defense, and whether you are looking for security or scalability — we can help.
