# VOLTAIQ

Battery intelligence has never been better

OVERVIEW

The goal of the project was to create a scalable and information-dense interface that was easy to use and matched Voltaiq's new branding.

Lean and Efficient Design

The Awasu and Voltaiq teams worked together in a tight & agile manner, utilizing design sprints to quickly complete the project. With a tight timeline and limited resources, it was important for the team to be efficient and effective in their approach. Awasu leveraged their expertise in design systems and helped Voltaiq transition to Figma to improve collaboration and faster iteration.
