STAND PROGRAMME

24-27 AUGUST 2026

**Stand 9050, Hall 9 - next to the
Centre Court**

**Energy Transition Norway, GCE Ocean Technology and Energy Valley
at ONS 2026**

MEET ENERGY. SHAPE THE FUTURE.

Find us at stand 9050, Hall 9 - next to the Centre Court. Energy Transition Norway, GCE Ocean Technology, and Energy Valley are joining forces at ONS 2026 to showcase the best of Norwegian energy technology. Together, we represent a community of over 300 members spanning the full breadth of the Norwegian energy sector - from oil and gas and offshore wind to hydrogen, carbon capture, and emerging technologies.

Our joint presence at ONS is part of Energy Cluster Norway (ECN), a new national platform for energy innovation uniting three of Norway's leading energy clusters under one roof.

AT OUR STAND

Throughout the week, we will host a seminar series featuring cluster companies presenting solutions, project experience, new initiatives, and investment opportunities. Stop by to meet the companies shaping Norway's energy future - and find collaboration.

MONDAY - 24 AUGUST

Opening day

10:45	We foster innovation - Energy Cluster Norway
11:30	Break
11:45	New initiative - Energy Cluster Norway
12:45	Break
13:00	Official opening and launch of the new, national platform Energy Cluster Norway uniting GCE Ocean Technology, Energy Transition Norway, Energy Valley
14:15	Break
14:30	Fra råvareeksportør til Energinasjon 2.0 - Seid, NORCE, m.fl.

BOOK A MEETING ROOM

Cluster members and partners can book a meeting room at our stand, fitting up to six people for business meetings during ONS. Please check our website for details.

TUESDAY - 25 AUGUST

ABOUT THE ORGANISERS

Energy Transition Norway is an energy cluster based in Stavanger, Norway's energy capital, bringing together world-leading expertise and technology environments to accelerate innovation across the energy sector.

Energy Valley is a world-leading competence and technology cluster working to create new opportunities for the Norwegian energy industry.

GCE Ocean Technology drives progress across the entire ocean sector by connecting entrepreneurs, corporates, universities, research institutions, and capital providers.
