

# Watched VIN's

REAL-TIME ALERTS AND INSIGHTS ON NEW VEHICLE DELIVERIES

Sometimes you need to follow a VIN every step of the way.

This is why VINView lets you "watch" a VIN for easy access from the VINView home page!

## Here's how it works...

VINView®

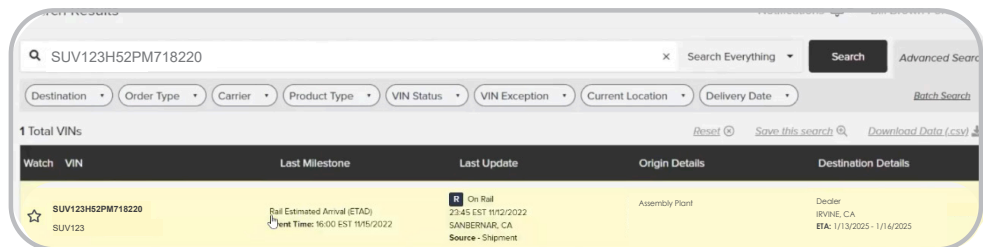

Q SUV123H52PM718220

1

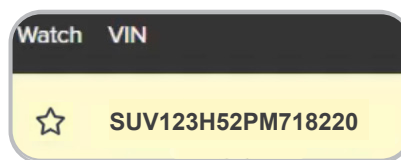

You start by entering the VIN (or at least the last 8 digits)

2

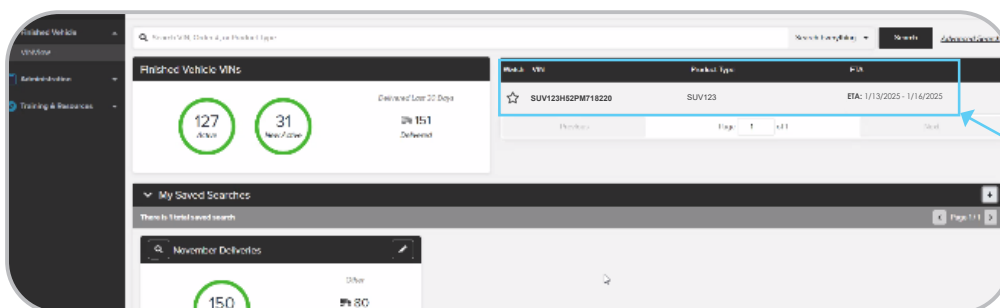

**Like this example:**  
An SUV with an ETA to Irvine, CA between January 13-17, 2025.

Just to the left of the VIN, check the "Watch" box.

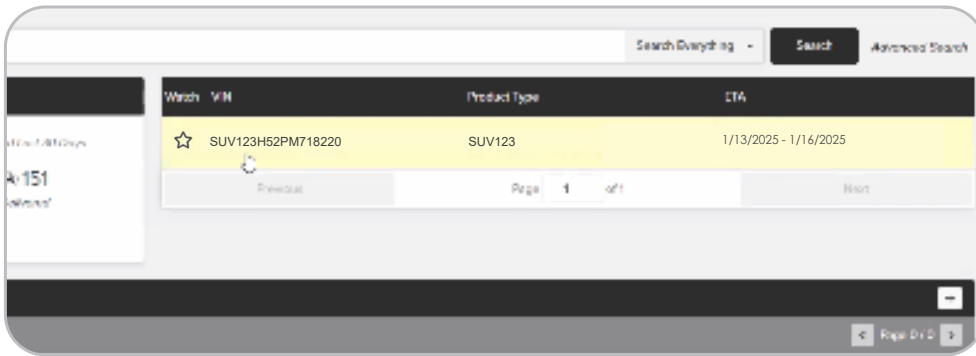

This will save the VIN on your VINView Home page.

3

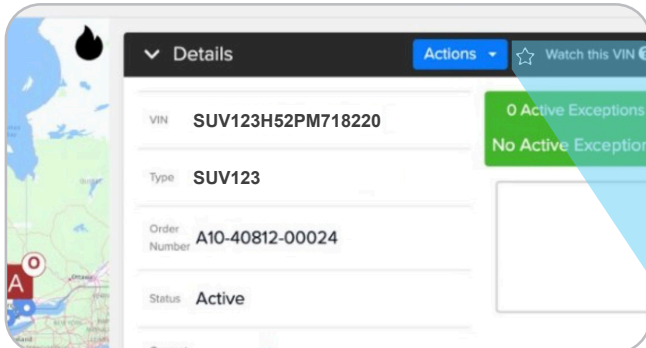

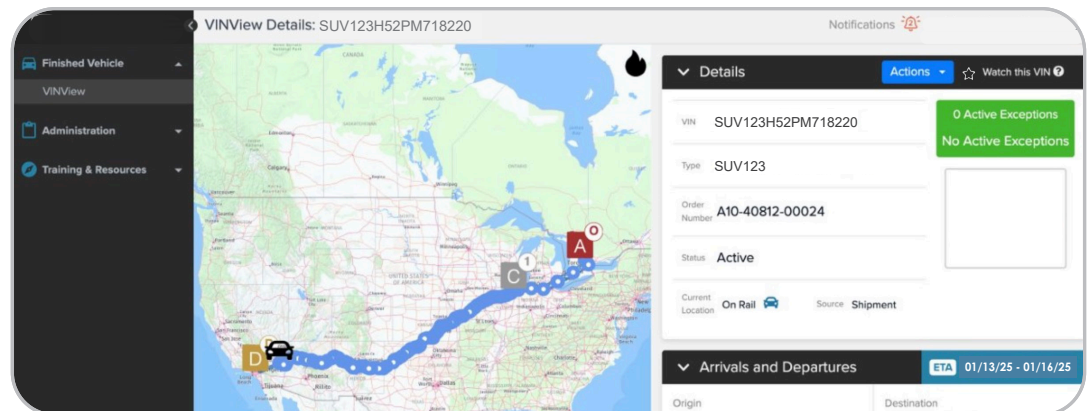

Now on the right, you can see that the VIN has been added to your "Watch" List.

**4** Now you can easily **click on the VIN to see the details** from the home page.

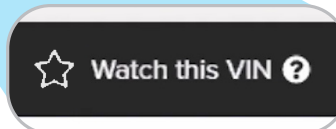

You can now see the VIN's **location on the interactive map**,

and its details - including arrival and departure.

You can also add a VIN to your **"Watched VIN"** list

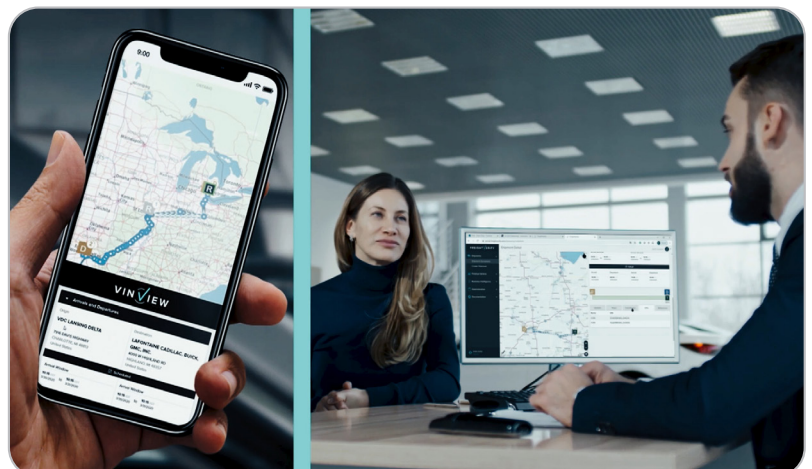

by checking a box in the upper right corner of the Details section, where it reads "Watch This VIN."

This is just one example that shows how VINView helps you **watch out for your next customer...**

as well as your incoming VIN's.

**Find your VIN's today.**
