GENERATION**

WEST ORANGE, New Jersey – The Jewish Foundation for the Righteous (JFR) selected 23 middle and high school educators and Holocaust center staff from eight states to participate in its 2026 Advanced Seminar, an intensive two-day academic program focused on strengthening Holocaust education and addressing both historical and contemporary antisemitism. This year's seminar placed special emphasis on the opportunities and challenges of artificial intelligence in Holocaust education and research. The program took place January 17–18 in New Jersey.

The Advanced Seminar is an intensive graduate-level program in which a select group of educators who are already well-versed in Holocaust history are given the opportunity to study more focused topics relating to the Holocaust and antisemitism from world-renowned lecturers.

This year's program focused on the future of teaching the Holocaust, including the impact of Artificial Intelligence in Holocaust education, historical research of the Holocaust, and its impact on antisemitism.

This year's speakers included Prof. Andy Pearce of University College London, Prof. Avinoam Patt of New York University, Prof. Noah Shenker of Colgate University and renowned Holocaust historian and exhibition curator Paul Salmons.
