

**Bricklayers & Allied Craftworkers  
Pension Fund of AB & SK**

CRA Registration No. 0584888

**Pensioner Returning  
to Covered Employment**

When a Pensioner younger than age 71 returns to Covered Employment, he may choose one of the following two options:

**Option 1**

Suspension of pension benefits for any calendar month so employed. Upon subsequent retirement, the Pensioner will be entitled to a re-computation of his/her pension amount, based on:

- a) Any additional Benefit Credit accrued up to age 71, if the Pensioner **worked 600 hours** or more during the re-employment period,
- b) His/Her attained age upon resumption of his/her pension, but
- c) A reduction of his/her attained age as it applies to the previously earned Pension Credit by the number of months for which he previously had received pension benefits.

**Option 2**

Continuation of pension benefit payment in the amount payable before his/her return to Covered Employment, in which case he/she would not be entitled to a re-computation of the pension amount as outlined in (1) above or any other credit or benefit for contributions made on behalf of the Pensioner upon and after the return of the Pensioner to Covered Employment.

I do hereby elect OPTION \_\_\_\_\_.

I understand I may elect one of the above options and that should I elect OPTION 1, then the suspension and further benefit accrual will become effective with the month following written notice to the Administrator of such notice. I also understand that once I have elected the suspension of benefits, I cannot revoke such election.

If a response is not received by the Administrator within 60 days the Pensioner's file will be treated as if Option 2 had been elected.
