PRODUCT DESCRIPTION

The hose coding from Michel Tube is available in defined colors, in which tube connectors and/or hoses are also available. The ring coding is a ring that is placed over the hose and slips onto the hose coupling by gravity. When the hose is changed, the ring falls out and is not disposed of with the worn hose. Ring coding offers a simple and cost-effective way of color-coding lines and coupling points. This identifies machines and makes incorrect coupling more difficult.
