SUCTION LANCE NOZZLE FOR CONTAINER

FACTS

- + Material: Stainless steel 1.4301
- + Spigot can be retrofitted
- + Ideal for "dustbins"

PRODUCT DESCRIPTION

Waste garbage cans in which plastic granulate is stored are widely used in practice. Waste garbage cans are inexpensive, rollable and have a lid. Waste garbage cans make sense for certain applications, even if they also have disadvantages in terms of electrical drainage. In order to convert waste garbage cans into material containers, we offer suction lance nozzles in various diameters. The nozzles can be retrofitted to waste garbage cans on site and are durable and reusable.
