HOSE RING | VARIOUS COLORS

FACTS

- + Stainless steel ring for loose attachment to the hose
- + Easily removable for hose changes or recoding
- + Custom designs on request

PRODUCT DESCRIPTION

The hose coding from Michel Tube is available in defined colors, in which pipe connectors and/or hoses are also available. The ring coding is a ring that is placed over the hose and slides onto the hose coupling due to gravity. When the hose is changed, the ring falls out and is not disposed of with the worn hose. The ring coding offers a simple and cost-effective way to identify lines and coupling points with colors. This marks machines and makes incorrect coupling more difficult.
