

Screw Couplings

Stainless steel couplings with a metal-to-metal seal and a full bore. The rotation lock supports one-handed operation in confined spaces or areas with limited access. The range includes pipe connections, hose connections and cover caps.

Male Part | Pipe Connection

- + Material: stainless steel; metal-to-metal seal
- + Precision stainless steel turned part with full bore and union nut
- + The rotation lock enables one-handed operation in confined spaces.
