Stainless Steel Suction Lances

Stainless steel suction lances are used at the intake point to convey granules from material containers and octabins. Adjusting the added air regulates the suction of plastic granules from the container.

With Internal Bracket

- Material 1.4301
- Inner tube with 45° miter cut
- Total length approx. 1000 mm; special lengths on request

Stainless Steel Suction Lances

VarioXpipe® | Suction Lance with Filter

- Material 1.4301 / POM
- Inner tube with 45° miter cut
- Total length approx. 1000 mm including air filter; special lengths on request

Article No.	Ø [mm]	W.T. [mm]	OD [mm]	L [mm]
SLE-040015-060315-1000-LF	40.0	1.5	60.3	1000
SLE-045015-060315-1000-LF	45.0	1.5	60.3	1000
SLE-050015-060315-1000-LF	50.0	1.5	60.3	1000

Integrated air filter for demanding air-purity requirements. Consistent filtration is required throughout the suction process.

Single-Pipe System

- Material 1.4301
- Including laser cutouts for adjustment of added air
- Total length approx. 1000 mm; special lengths on request
