

Point Grey Renovation

Our client remembers visiting this house as a child, the house of her grandfather, and the place where her father grew up. Ringing the twist doorbell, and looking out the rear window from the kitchen nook were her strongest memories.

We blew open the floor plan and re-planned to facilitate their current needs, allowing for the opportunity to gather and celebrate, as well as retreat & relax. The interiors were made bright, clean and modern, balanced with subtle detailing and built-in design features with consideration to the age of the house. A key feature seen the moment you enter the home is the modern floating staircase.

What a unique opportunity they had - to take over care of the home, and renovate it to suit their growing family. Creating a modern and contemporary home while preserving the integrity, memories and treasured details recalled from youth, was both our core challenge and joy. The twist doorbell still greets you at the front door, and the view is just as grand today from the rear window in the kitchen nook.

Paul & Michelle,

Thank you for the opportunity to design and build your home. We hope you enjoy it as much as we've enjoyed being of service.

Sincerely,
The Novell Design Build Team
