

Director RWE Denmark | Real-World Evidence & Health Data

NordicRWE · Denmark

Do you want to lead NordicRWE's expansion in Denmark? NordicRWE is a research and technology company that leverages unique Nordic health data to generate real-world evidence for the pharmaceutical industry and public health sector. We are growing and are now looking for a Director to build and lead our Danish presence.

Who are you?

You are a senior leader with deep expertise in real-world evidence and a strong network in the Danish life sciences or health data ecosystem. You combine scientific credibility with commercial acumen and a genuine passion for making health data work harder for patients and industry alike. You are entrepreneurial by nature — motivated by building something meaningful, developing a team, and establishing NordicRWE as the go-to RWE partner in Denmark. You lead with clarity, bring out the best in people, and are equally comfortable in a client meeting and a scientific discussion.

What are we looking for?

- Significant experience in RWE, HEOR, epidemiology, or a related discipline — from pharma, CRO, academia, or a public health setting
- A proven track record of leading and delivering complex RWE studies and managing teams
- Deep knowledge of the Danish health data landscape, including registries, regulatory frameworks, and key institutional stakeholders
- Experience navigating data access approval processes (e.g. Statistics Denmark, Sundhedsdatastyrelsen, the Danish Data Protection Agency)
- Strong business development experience — identifying opportunities, building client relationships, and closing deals
- Excellent communication skills in English and Danish

What will you do?

- Lead and grow NordicRWE's operations in Denmark, including building a local team

- Drive business development and own client relationships with pharma and biotech companies
- Oversee the scientific quality and delivery of RWE studies using Danish and Nordic health data
- Represent NordicRWE externally — at conferences, with data authorities, and with strategic partners
- Contribute to protocol development, study design, and regulatory submissions where needed
- Work closely with the NordicRWE leadership team on strategy, growth, and cross-Nordic collaboration

What can you expect?

This is a unique opportunity to shape NordicRWE's presence in Denmark and play a defining role in the Nordic Real-world evidence landscape. We offer a senior position with significant autonomy, competitive compensation, and a passionate team that believes in what we do.

How to apply

Send your application and CV to info@nordicrwe.com no later than 21 June 2026.
