Past Performance is not indicative of future results. Returns reflect reinvestment of dividends/distributions. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The investment adviser has agreed to waive a portion of its management fee subject to net assets under management through 7/31/28. Current performance may be lower or higher than the performance quoted. Performance current to the most recent month end may be found at www.aristotlefunds.com/performance or by calling 1-844-274-7885. Please see the current prospectus for detailed information.

¹Class I-2 shown. The 30-Day SEC Yield represents the net investment income earned over the 30-day period ending on the above date and includes any fee waivers and expense reimbursements. It is an annualized rate calculated under a methodology prescribed by the Securities and Exchange Commission (SEC). Yields for other share classes will vary. ²Class A shares at maximum offering price (MOP) reflect the deduction of the up-front 4.25% sales load. ³Performance shown prior to share class Inception Date is hypothetical and is that of Class I shares (12/19/11 inception date), restated to reflect applicable service and/or 12b-1 fees. Class I-2 shares are sold at net asset value (NAV) without an initial sales charge and do not include a CDSC. Performance reflects any applicable fee waivers and expense reimbursements. If a sales charge had been deducted, the results would have been lower.

All share classes may not be available at all firms, and not all investors may be eligible for all share classes.

*There is no guarantee the Fund will achieve its investment goal.

ARISTOTLE HIGH YIELD BOND FUND

⁴Ratings received from S&P®, Moody's, and/or Fitch and measured on a scale that generally ranges from AAA (highest) to D (lowest) and may change over time. The higher rating is used when rating agencies rate a security differently. All ratings are converted to the equivalent S&P major rating category for purposes of the category shown. ⁵Includes bonds and floating-rate loans.

Risk/Return Profile (October 2005 - September 2025)

Source: Morningstar® Inc. as of 9/30/25.

⁶Composed of a single Treasury bill issue purchased at the beginning of the month and held for a full month. ⁷Composed of publicly issued US corporate and specified foreign debentures and secured notes that meet the specified maturity, liquidity, and quality requirements. ⁸Composed of investment-grade US government and corporate bonds, mortgage pass-through securities, and asset-backed securities. ⁹Measures the performance of high-yield bonds with a 2% maximum allocation to any one issuer. ¹⁰A market capitalization weighted index of 500 widely held stocks often used as a proxy for the US stock market.

Investing involves risk. Principal loss is possible. The Fund is subject to liquidity risk (the risk that an investment may be difficult to purchase, value, and sell particularly during adverse market conditions, because there is a limited market for the investment, or there are restrictions on resale) and credit risk (the risk an issuer may be unable or unwilling to meet its financial obligations, risking default). High-yield/high-risk bonds ("junk bonds") and floating-rate loans (usually rated below investment grade) have greater risk of default than higher-rated securities/higher-quality bonds that may have a lower yield. The Fund is also subject to foreign-markets risk.

Investors should consider a fund's investment goal, risk, charges and expenses carefully before investing. The prospectus contains this and other information about the fund and can be obtained at www.aristotlefunds.com. It should be read carefully before investing.

Bloomberg US High-Yield 2% Issuer Capped Bond Index measures the performance of high-yield bonds with a 2% maximum allocation to any one issuer. Indexes are unmanaged and cannot be invested in directly. Further, they hold no cash and incur no expenses. **Duration** measures a fund's sensitivity to interest-rate risk where the longer a fund's duration, the more sensitive, and vice versa. **Maturity** of a debt instrument, refers to the specific period of time until final payment (principal and any applicable interest) is due.
