

FREE On-site Inspection Services**Until the End of October 2025**

On-site assessment by our international geologists and engineers to diagnose landslide causes, movement signs and immediate risks to people, assets, and operations

What We Offer

- One-day field survey and on-site assessment for landslide risk by qualified experts
- Inspection report with analysis within 10 days
- Practical countermeasures plan and recommendation solutions

Why Act Now

- Asset protection to prevent loss due to disaster
- Early warning and mitigation with initial investigation before failures
- Improve resilience by informing safer designs, maintenance plans, and hazard-aware site management
