- Connect with students & startups shaping the future of food

Student's Feedback from 2025:

"It is save to say, that this was the most educational and fascinating week I've had this year."

"Two weeks full of inspiration, exchange and hands-on learning are behind us. The Food Tech Summer School 2025 was more than just an academic journey. Together with a diverse international group of students we explored key topics like sustainable proteins, circular food systems and innovation in nutrition."
