

# Patient Bathroom (MODS)

Permitting & Code References\*

## Fire Protection & Life Safety Requirements

- Life Safety
  - Compliance with IBC or NFPA 101-based life safety requirements.
- Sprinkler System
  - Modular bathrooms include pre-punched holes for sprinklers.
  - Sprinkler system to be installed by site GC (General Contractor) per jurisdictional standards.

## Accessibility Compliance

- Designated models for ADA-compliant bathrooms:
  - Multiple units are available ADA and ANSI compliant for accessibility.
  - Units that are designed for accessibility include grab bars, accessible clear spaces and clearances for all fixtures, and compliant shower systems.

## Construction & Finish Requirements

- Impact-Resistant Materials: built with 5/8" very high-impact drywall, mold-resistant
- Submittal Compliance Notes:
  - Wall and floor integration requires project specific coordination and planning
  - Finish floor elevations, tapers, and recessed slab requirements are called out for alignment with modules and require coordination in architectural and structural engineering.

## Site Coordination & Permit-Related Scope Division

The following components are specifically marked as site-installed and inspected, which may require local permit coordination:

- Sprinkler installation
- Firestopping (plumbing/fire penetrations)
- Rated wall construction and inspection prior to module set
- Concrete slab work with block-outs for drain bodies
- Gyp board and insulation installation on exterior side of bathroom modules
- Final wall painting (modules are only primed)

## Manufacturer Scope (Permitting Implications)

Items included by BLOX:

- Doors and hardware for bathrooms
- Finishes and fixtures
- Electrical rough-in including critical/emergency power
- Plumbing fixtures and rough-in
- ADA grab bars and specialty accessories (soap shelves, robe hooks, etc.)
- Exhaust/supply diffusers (fixtures, not ductwork)

\*The code and permitting information provided is for general reference only and reflects past permitted projects. Building regulations vary by state and local jurisdiction and must be verified for each specific project location. BLOX's team of experts is equipped to navigate and implement FED products nationwide, ensuring compliance with all applicable local and state requirements.
