

DIY STICKERS

This customizable craft lets your autistic kiddo practice fine motor skills and creativity as they bring their ideas to life!

WHAT YOU'LL NEED:

- Marker or pen
- Color pencils
- Copy paper
- Parchment paper
- Clear tape
- Scissors

INSTRUCTIONS:

1. Assist your kiddo in outlining their sticker designs.
2. Using color pencils, have your kiddo color in the designs.
3. Cut the designs from the paper, leaving some white space around the design.
4. Take a piece of parchment paper and add a piece of tape to create the sticky part of your sticker.
5. Place your colored design on the piece of tape and cover it with another piece of tape. You may need more than one strip depending on the size of your sticker designs.
6. Once the stickers are sealed, help your kiddo cut out the stickers from the parchment paper. Be sure to leave some space around the design to ensure the two pieces of tape seal the design.
7. Peel the parchment paper off the back of your kiddo's design, and they're now ready to use their stickers!
