

DIY ANIMAL FEEDER

**Connect with
nature in this
allergy-
friendly craft.**

WHAT YOU'LL NEED:

- Apples with Stems
- Bird Seed
- Unflavored Gelatin
- Twine

INSTRUCTIONS:

1. Prepare your unflavored gelatin according to the package. You'll want to use 1/4 cup of water for every packet of gelatin.
2. Once your gelatin mixture has cooled, mix in 1 cup of seed for every packet you use.
3. Prepare your apples by scooping out the center with a spoon. Make sure to keep your stem intact at the top.
3. Spoon your seed mixture inside of your apples and place them on a baking sheet before putting them in the refrigerator.
4. Allow your mixture to set for about two hours. Times may vary based on the gelatin brand.
5. Once set, attach twine or string to the stem of your apple so it hangs upright. Then it's time to find the perfect spot to hang it for squirrel viewing!
