

EARTH-FRIENDLY SUNCATCHERS

Practice fine motor skills while they cut and color their custom suncatchers!

WHAT YOU'LL NEED:

- Plastic
- Markers
- Hole puncher
- String

INSTRUCTIONS:

1. Assist your kiddo in cutting your clean plastic into the shapes of their choosing.
2. Using your markers, create designs for your suncatchers. Color all of the plastic to create a stained glass effect.
3. Use a hole puncher to create a hole at the top of each suncatcher.
4. Tie a piece of string to each suncatcher to hang up by a window!

Note: Thin, clear plastic will be the easiest to work with for this craft.
