Introduction

OzWind is an emerging project services provider, specialising in wind turbine installation during wind farm construction. With hands-on expertise across multiple turbine types and project scales, we deliver safe, efficient, and high-quality installation outcomes.

Founded in 2023 by Adam Dodd, a seasoned industry professional with extensive experience leading large turbine installation projects, OzWind combines practical insight and technical intuition with a commitment to building high-performing teams.

Our focus is on end-to-end turbine installation services, ensuring projects are completed on time, on budget, and to the highest standards.

OzWind is proud to play an active role in Australia's energy transition, helping drive sustainable renewable energy deployment.

"Empowering people, achieving collective excellence, with unwavering integrity, and without compromising safety are the values that guide us." – AD

Adam Dodd

Founder &
Managing Director
MAICD

Our Purpose

A large wind turbine is shown at night, illuminated by bright yellow lights on its base. The turbine's blades are visible against the dark sky. The image is part of a background graphic that transitions from black to green.

➔ Mission

Empowering people to build a greener future for themselves, our clients, and the planet, while prioritising safety, quality, and productivity.

➔ Vision

By 2030, OzWind will be the leading wind industry service provider and construction consultancy in Australia—both the employer and supplier of choice. We will achieve this through innovation, world-class training, the highest quality services, top talent, and unparalleled expertise.

Our Services

➔ Turbine Installation

End-to-end turbine assembly: Component unloading, preparation, erection, electrical & mechanical completions, handover, and more.

➔ Site & Construction Management

Site representation, supervision, resource optimisation, scope, sequencing, WHSEQ, coordination, auditing and reporting, and more.

➔ Project & Contract Mangement

Management of claims, change, resourcing, risk, program, variations, deliverables, departures, formal correspondence, and more.

➔ Consultancy

Strategic consultancy for planning, tendering, execution, delivery, and handover – for owners, OEMs, and contractors.

✓ **Licenced Electrical Contractor (QLD 90983)**

✓ **Registered Labour Hire Provider (QLD, VIC)**

✓ **QBCC Site Supervision Licence (QLD)**

✓ **Cm3 WHS Certification (exp.)**

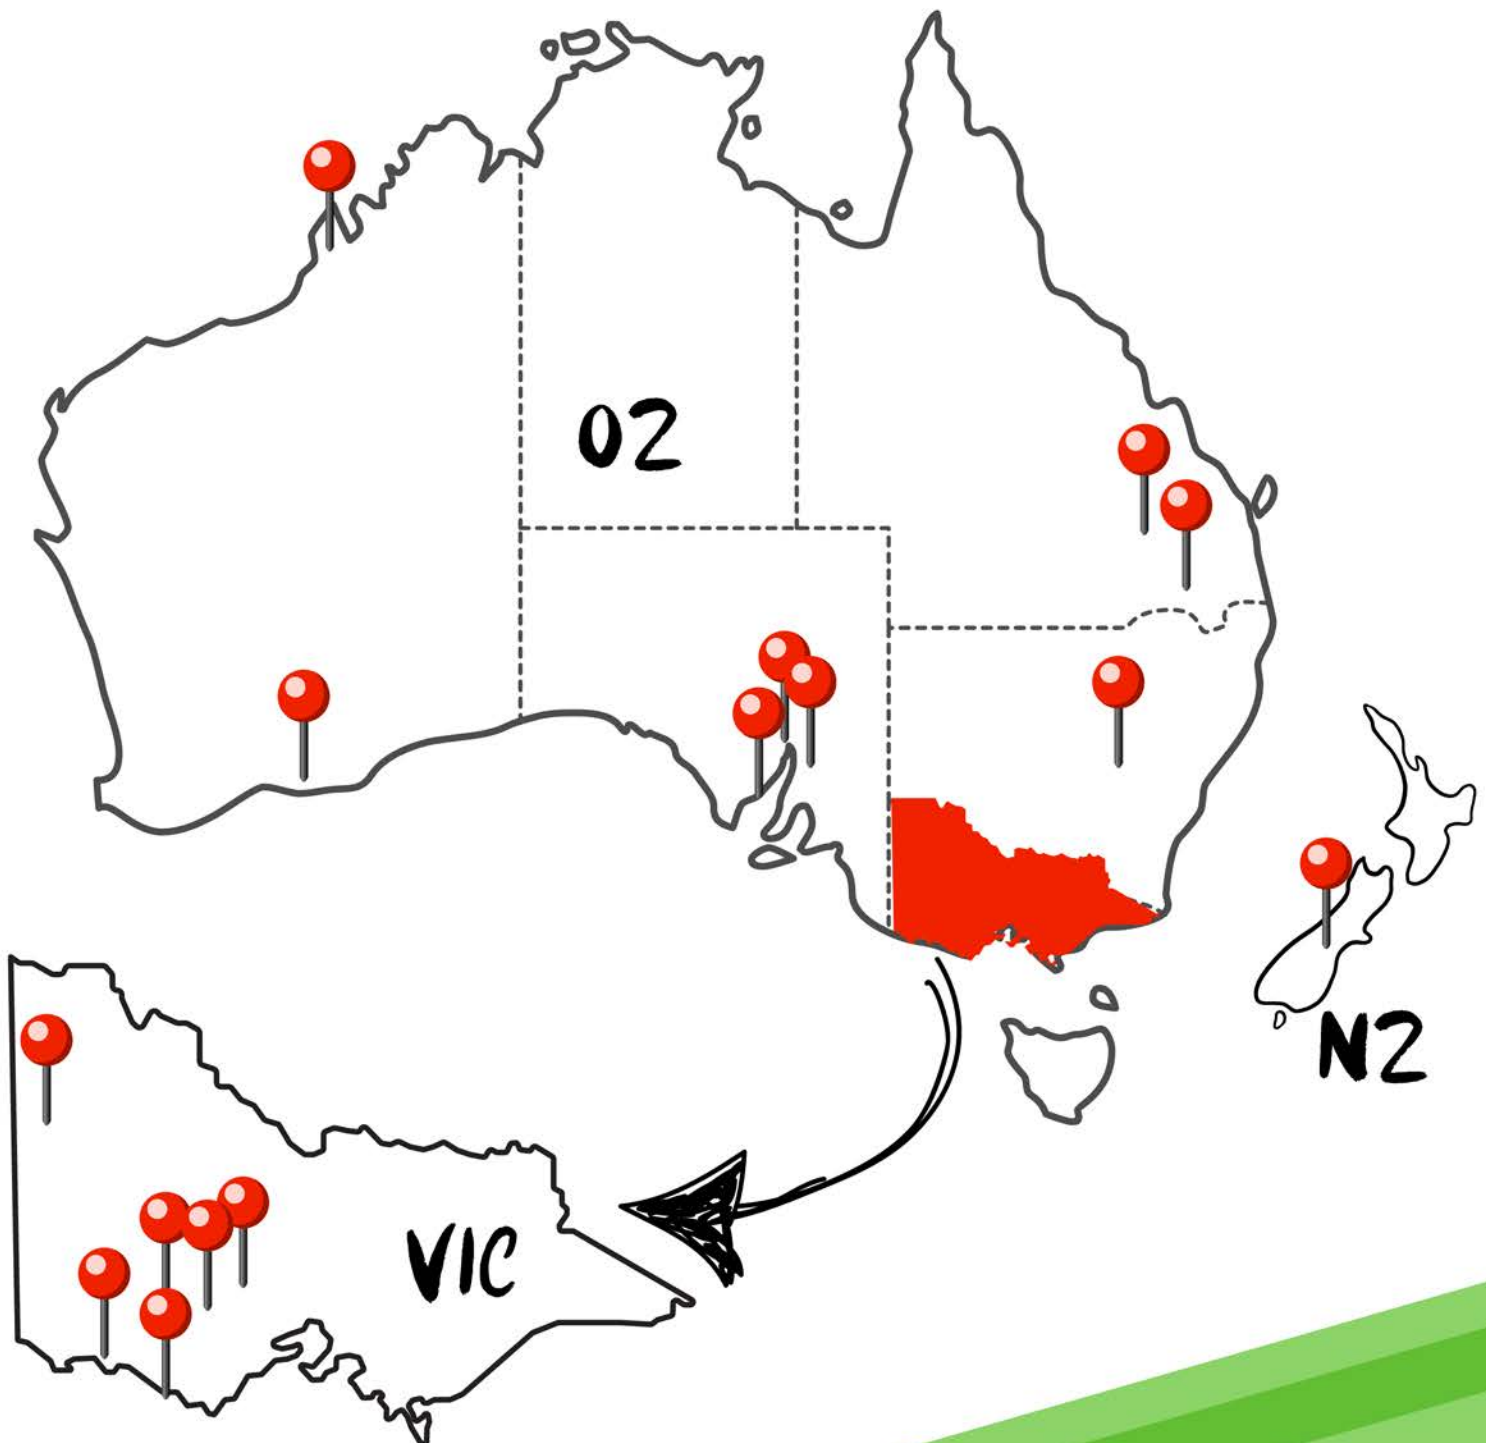

✓ **200+ Wind Turbines Installed**

✓ **14 Wind Farm Construction Projects**

✓ **6 Turbine (OEM) Manufacturers**

Case Study 1

Hawkesdale Wind Farm Project

➔ Challenges

- Late mobilisation of project resources
- Coordination of multiple contractors (3-4)
- Managing shared / collective resources
- Cost pressures due to Schedule of Rates
- Maintaining productivity and efficiency
- Increased client (OEM) risk and exposure

➔ Solutions

- Provide project superintendency and supervision
- Implement collective detailed planning and reporting
- Effective resource management and forecasting
- Streamline coordination and communication
- Proactive scheduling and advisory services

➔ Results

- Increased client visibility
- Improved efficiency, productivity, and accountability
- Strengthened collaboration between stakeholders
- Optimised collective resource utilisation
- Mitigated risks and delays
- Successful project execution and delivery

Case Study 2

Harapaki Wind Farm Project (NZ)

➔ Challenges

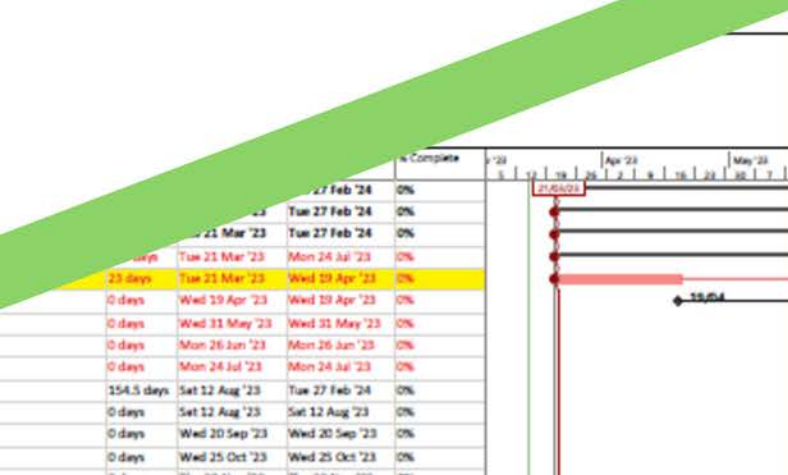

- OzWind's first engagement, new client
- Head C&I Contractor Representation
- First project in NZ, new OEM (Siemens)
- Overdue contract deliverables
- Complex contracts (2 up, 1 down)
- Force Majeure event (Cyclone Gabrielle)

Solutions

- Proactive collaboration with stakeholders
- Comprehensive contract reviews, mitigation strategies, legal liaison
- Contract departures and negotiations
- Change and time management, scheduling
- Effective formal correspondence management including timely submission
- Document deliverables and doc control
- Claims for Extension of Time (EOT)

➔ Results

- Awarded additional (parallel) upstream contract with owner
- Timely submission of contract document deliverables
- Strengthened relationships with Siemens Gamesa and Meridian Energy
- Ensured contractual compliance and risk mitigation

Case Study 3

Dundonnell Wind Farm Project (ProWind)

➔ Challenges

- First large-scale project for the company
- Recover project delays
- Ambitious acceleration program
- Optimise resource utilisation
- Increase efficiency and productivity
- COVID-19 restraints and restrictions

➔ Solutions

- Implemented an additional (night) shift
- Introduced a third main crane
- Systematic resource allocation
- Precision planning
- Strategic decision-making

➔ Results

- >15% reduction in headcount (despite acceleration)
- Erected six turbines in a single week on multiple occasions
- Installed final 50 turbines in <15 weeks
- Completed mechanical and electrical works (without acceleration) within four weeks post-main erection
- Completed backloading, returns, and demobilisation within an additional four weeks
- Awarded three subsequent (concurrent) projects, secured a new global OEM client

OzWind Founder's first assignment as a Site Construction Manager for ProWind, within 6 months of entering the industry.

Case Study 4

Esperance Wind Farm Project (ProWind)

➔ Challenges

- First full rotor lift for the company
- First full crane & installation (C&I) contract
- First project with OEM (Goldwind)
- First project in Western Australia (WA)
- COVID-19: Mobilisation and procurement
- Two additional concurrent projects

➔ Solutions

- Strategic recruitment and team building
- Close collaboration with stakeholders
- Mentoring of Site management team
- Systematic resource allocation
- Precision planning

➔ Results

- Awarded client performance bonus
- Incident-free project execution
- Achieved installation labour targets
- Strengthened company reputation with OEM and project stakeholders
- Subsequent full-scope award on the largest project in the Southern Hemisphere project with another new (OEM) client

Part of OzWind Founder's concurrent project portfolio, following a promotion to Project Director at ProWind.

Testimonials

Chloe Bell

Senior manager APAC
Service Solutions

"Adam (OzWind Founder) is extremely organised, plans tasks meticulously, and is a well respected people leader. His broad skills and experience from both a white and blue collar perspective allow him to be relatable, as well as professional and engage with all stakeholders."

Andrew Smith

Logistics Manager
Rex Andrews Transport

"I have worked with Adam on countless wind projects. He runs a tight ship, avoids delays, and can build, lead and manage large teams effectively and efficiently. Gun operator and straight shooter, has my full respect!"

James Overton

Project Installation
Manager

"Adam played a pivotal role in our successful project at Esperance. With his extensive knowledge, expertise, and unwavering dedication, I highly recommend his services without hesitation."

Matthew Cytrowski

Owners Representative

"I have worked with Adam on multiple large scale projects in the wind industry. His planning, organisation and management skills are second to none."

David Hodgson

Manager - Renewables
Project Execution

"I worked with Adam on the largest project in Australia under construction at the time, I always found him to be professional, proactive and a genuine leader, would happily work with him again."

Rui Cruz

Site Installation
Manager

"I have worked with Adam on multiple projects in the renewable industry, I always found Adam very diligent in his approach. Adam puts the E in effort and has the required expertise to deliver any WTG installation project."

Robert Boshoff

Site Installation
Manager

"Throughout my time in the renewables industry, Adam Dodd is one individual who uniquely stands out. Adam displayed great talents in Risk Management, Cost Control and overall work efficiency. Adam has the ability to see a problem before it develops".
