

14th April 2026

Dear Resident,

RE: Update on upcoming works for Nirimba Fields neighbourhood enhancements

Further to recent communication from Defence Housing Australia (DHA) regarding the progression of the Nirimba Fields streetscape enhancements, we are excited to confirm we have appointed Perfection Landscape Services to carry out important works to improve the neighbourhood in 2026, including the planting of more than 600 new street trees and laying of over 2km of footpaths.

Residents will receive a letter from Perfection Landscape Services up to 14 days before works commence in your street. Depending on your location within the overall program, this notification may arrive within the coming weeks or in a few months' time.

As part of the next stage of improvements in Nirimba Fields, DHA has engaged Perfection Landscape Services to deliver new footpaths and street tree planting. All works have been approved by Blacktown City Council and will be delivered in accordance with Council requirements.

These works will enhance your street by improving connectivity and comfort for residents and their families. A mix of trees have been selected to suit local conditions and contribute to cooler, greener streets over time.

Scope of works	
Footpath works • Excavation of footpath areas • Pouring of concrete footpaths and allowing time for curing • Backfilling either side of the new footpath with soil	Street tree works • Excavation of tree pits and installation of root barrier • Installation of new street trees • Mulching and tidying up of tree area

New street trees and footpaths form an integral part of the long-term delivery of DHA's Nirimba Fields neighbourhood, helping to create a greener and more walkable neighbourhood. Over time, established trees will contribute to a more sustainable and aesthetic neighbourhood with cooler streets and a more leafy suburb. We appreciate your support as we deliver these improvements and encourage you to take an interest in the health of your street tree as it grows.

What to expect during works

During these works you may notice:

- An increased presence of construction vehicles, trucks and machinery
- Temporary changes to pedestrian and traffic conditions,
- Barricaded work zones for safety
- Controlled open excavations and active works zones while construction is underway.

When will I receive the letter from Perfect Landscapes about works starting in my street?

The streetscape enhancements will be delivered progressively across the neighbourhood. You will receive a letter from Perfection Landscapes up to 14 days before works begin in your street. This may occur within the coming weeks or months, depending on your location. The letter will include more information including contractor contact details.

How long will these works take?

While the overall streetscape program will be delivered progressively across the neighbourhood, works in individual streets typically take around two weeks, subject to weather conditions and street length. The full program is anticipated to be completed by spring 2026, weather permitting and without any unexpected delays. DHA anticipate the first phase of delivery will commence at streets including Siding Terrace, Dorland Street and part of Swordfish Street, noting that works may not occur in this order.

Contact details

For enquiries about the Nirimba Fields development, please contact Defence Housing Australia (DHA) via:

- Visiting the Sales Centre at the corner of Aerodrome Drive & Lockheed Drive, Nirimba Fields
- Emailing: developments@dha.gov.au
- Calling 1300 258 628.

We appreciate your patience and thank you for your support as we continue to improve the neighbourhood. For more information, visit akunavista.com.au or scan the QR code below.

Kind regards,

Defence Housing Australia (DHA)
