

July 2026 NATO Summit Survey Findings

U.S. National Survey Results

Detailed Research Methodology

- This survey was conducted within the United States from **July 9th to 10th** among 1,019 **registered voters**.
- Recruitment occurs through a broad variety of professional, validated respondent panels to expand the sampling frame as wide as possible and minimize the impact of any given panel on recruiting methods.
- The results reflect a **nationally representative sample of registered voters**. Results were weighted for age, gender, region, race/ethnicity, income, political party, education, and ideology where necessary to align them with their actual proportions in the population. The margin of error for the total sample is +/- 3.1 percentage points.

The sample size and sampling margin of error

1,019 Registered voters in total	+/-3.1 pts Sampling Margin of Error
379 Republicans (GOP)	+/-5.0 pts Sampling MoE
358 Democrats	+/-5.2 pts Sampling MoE
270 Independents	+/-6.0 pts Sampling MoE

Note: Some percentages on the slides may not add up to exactly 100% due to rounding.
