5 Compensation can be considered as a voluntary unpaid donation. It is conceptually recognised as such by analogy in the EU Tissue and Cells Directive, it is reflected in the EU Commission Report on implementation of VUD Principle, and it is recognised by the Council of Europe Committee on Bioethics. In addition, different types of incentives and compensation are used by the public sector as well for the collection of whole blood.

11 The UK has banned locally-sourced plasma, relying exclusively on imports since 1998. The NHS Blood and Transplant service collects 350,000 litres of plasma yearly as part of whole blood donations for hospitals. Some 100,000 is used for transfusion and the remaining 250,000 was discarded or not used to manufacture medicines. Following the decision to lift the ban in February 2021, the whole blood donations from donors will be used the plasma from whole blood donations to also make medicines for patient care.

30 Executive Order - National Defense Resources Preparedness,16 March 2012 Part II, Section 201 (a), specifically sub a and Part VIII, General Provisions, section 801, sub (i) October 2016 into practice for health resources to deal with a major crisis in the US.

31 On August 23, 2020, the Food and Drug Administration (FDA) issued an Emergency Use Authorization (EUA) for the emergency use of COVID-19 convalescent plasma for the treatment of hospitalized patients with COVID-19, pursuant to Section 564 of the Act.3. On November 30, 2020, the FDA reissued the August 23, 2020, Letter of Authorization to add a test acceptable to be used in the manufacture of COVID-19 convalescent plasma.

32 Convalescent Plasma EUA letter of Authorization, March 19, 2021: The 2021 Authorization specifies the use of 'high titer' COVID-19 convalescent plasma to treat hospitalized COVID-19 patients, early in the course of the disease, and those hospitalized with impaired humoral immunity. The decision is based on evidence from ongoing clinical and randomized control trials on COVID-19 convalescent plasma, and trial results from studies of other medical products to treat COVID-19. https://www.fda.gov/media/141477/download
