Item 8.01 Other Events.

On or about September 20, 2025, BK Technologies Corporation (the “Company”) detected potentially suspicious activity involving its information technology (“IT”) systems. Upon detecting the issue, the Company began taking steps to assess, contain, and remediate the potentially unauthorized activity, including isolating the affected systems and launching an investigation with the assistance of external cybersecurity advisors.

As a result of the incident, a limited number of non-critical systems experienced minor disruption. However, through the Company’s remediation efforts, the Company believes that the third party responsible for this incident has been removed from the Company’s IT systems, and the Company’s ability to access information impacted by this incident has been restored. The Company’s operations have continued throughout the period since the detection of the cybersecurity incident in all material respects.

As part of the Company’s investigation into this incident, it appears that an unauthorized third-party may have obtained access to and acquired non-public information within the Company’s custody and control, which potentially includes records pertaining to current and former employees. The Company continues to investigate the nature and scope of the unauthorized access. The Company has notified law enforcement about this incident and intends to, as appropriate, furnish notice of this incident to affected parties and to regulatory agencies.

The Company currently expects that a significant portion of its direct costs incurred relating to containing, investigating and remediating the cybersecurity incident will be reimbursed through insurance recoveries.

While the Company’s investigation and assessment of this incident is ongoing, as of the date of this filing, the Company does not believe the incident is reasonably likely to materially impact the Company’s financial condition or results of operations.
