About Bodwé Group

- Awards in excess of $185M (with an additional $40M in backlog) from federal clients
- 190 federal contract awards in the last five years
- Over 600 team members across companies
- $20M line of credit
- A shared corporate infrastructure of Human Resources, Recruiting, and Finance that frees divisions to prioritize client projects
- Portfolio Talent: The connectivity of our companies allows us to seamlessly move SMEs where they are most needed, including across projects and companies

Bodwé Benefits

- **Ability for sole source awards up to $100M** without Justification and Authorization
- **Open discussions and negotiation prior to award (per 13 CFR 124.503)** authorized immediately following SBA approval for sole source procurements
- Elimination of pre-award schedule risk due to the **non-challengeable nature of tribally-owned sole source procurements (per 13 CFR 124.517)**

Bodwé Technology Solutions Core Capabilities

Information Management, Information Technology, and Low Voltage System Cybersecurity

Our team offers comprehensive IM, IT, and LVS Cybersecurity Planner services for federal projects. We specialize in effectively managing project-level deliverables, allowing our clients to focus on their leadership and Program Management Office (PMO) level deliverables.

Key areas of expertise include:

- Building access systems
- Access control systems
- Equipment monitoring systems
- Surveillance systems
- Telecommunications systems
- Audio-Visual (A/V) systems
- Desktop and mobile computer systems
- Medical/clinical equipment systems
- Local Area Network (LAN)/Wireless Local Area Network (WLAN)/Cybersecurity efforts/protocols/equipment
- Risk Management Framework (RMF) processes and protocols

We work closely with our clients and their leadership, ensuring that we are aligned with their needs and requirements. Our team navigates complex government protocols, processes, and culture, demonstrating our ability to manage the multiple issues that can arise in IM, IT, LVS, and Cybersecurity-focused roles and deliverables.

Energy Management

Bodwé Technology Solutions LLC provides expert energy management and engineering services to support federal Energy Management programs. Our services include developing and fulfilling energy master plans (EMPs), conducting retro-commissioning (RCx), and performing energy audits at various CONUS and OCONUS sites.

Key areas of expertise include:

- Facility operational issues
- Energy data, dashboards, and projects
- Energy Resilience and Conservation Investment Program (ERCIP)
- Measurement and verification (M&V)
- Energy Savings Performance Contracts (ESPCs)
- Utility budget forecasting

Our team coordinates with various federal agencies and their O&M contractors, serving as a professional and technical liaison between the client and their subcontractors. We work closely with facilities and energy management teams, providing guidance on ESPCs, improving dashboard reporting, and mitigating future issues.

Enterprise Training

Our goal is to increase efficiency, competitiveness, and accessibility by transitioning government agencies to digital technologies by carefully considering organizational technology goals and budgets. We focus our deliveries on human-centered design and augment them with training, coaching, and mentoring of leaders and teams to facilitate organizational success.

Key areas of expertise include:

- Scaled Agile Framework (Product Owner/ Product Manager; DevOps Practitioner; SAFe Agilist; SAFe for Teams; Agile Software Engineering; Lean Portfolio Management)
- Scrum Alliance (Certifed Scrum Master; - Certifed Scrum Product Owner; International Consortium of Agile; Agile Fundamentals; Agile Testing & Automation; Agility in the Enterprise; Coaching Agile Transitions; Agility in the Enterprise)
- DevOps Institute/ DevOps Agile Skills Association (DevOps Foundation; Site Reliability Engineering Foundations; DevSecOps Engineering; DevOps Test Engineering; DevOps Product Owner; DevOps Coach)

IT Management Support and Business Intelligence Development for Large-Scale Projects

Bodwé Technology Solutions LLC excels in providing Information Technology (IT) management support services for large-scale projects, such as BASE Communications buildings and Defense Health Agency (DHA) facility updates. Our team specializes in supporting all systems and processes that facilitate smooth transitions of IT management during these construction and renovation projects.

Key areas of expertise include:

- Technical engineering advice on unique medical systems, applications, and functions
- Low voltage systems design and construction engineering-specific issues
- Collaboration with NAVFAC Medical Design Office (MFDO) IT Planning support, Transition Manager, and installation IT personnel
- Business Intelligence Developer support, including Tableau dashboard development and SQL script writing for data ingestion
- Expertise in various IT and security systems, including building access, control and monitoring systems, surveillance, AV and telecom systems, desktop and mobile computer systems, and medical/clinical equipment systems
- LAN/WLAN and Cybersecurity support, ensuring secure, reliable, and efficient client systems
- Risk Management Framework (RMF) process support for new equipment
- Advanced use of computer programs and tools, such as data and documentation management, Computer-Aided Design and Drafting (CADD), and other specialized software
- Compliance with DoD and DHA training requirements in DoDD 8570.01 and DoD 8570.01-M for contractor employees working IA/IT functions

Our team understands the complexities involved in IT management during construction and renovation projects and strives to provide top-quality support to our clients at every step of the way. We leverage business intelligence tools and techniques, such as Tableau and SQL scripting, to help DHA effectively manage data and extract insights that inform decision-making.

Identity, Credential, and Access Management (ICAM), Command Control Communications Cyber and Intelligence, and Risk Management Framework (RMF) Services

Bodwé Technology Solutions LLC offers Identity, Credential, and Access Management (ICAM) solutions to ensure secure access to federal systems and resources. We implement ICAM strategies to manage digital identities, credentials, and access controls effectively, reducing the risk of unauthorized access to sensitive data and resources. Additionally, we provide Command Control Communications Cyber and Intelligence (C4I) RMF Services to support our clients in achieving and maintaining compliance with federal security standards. Our team of experts guides clients through the RMF process, ensuring that security controls are in place and functioning as intended.

Key capabilities include:

- Developing and implementing ICAM strategies for secure access to federal systems and resources
- Providing C4I RMF services to assist clients in meeting federal security standards
- Ensuring compliance with NIST SP 800-171 and Cybersecurity Maturity Model Certification (CMMC) 2.0 requirements
- Supporting IT and Telecom information and data broadcasting to enhance communication and information sharing across organizations

With our comprehensive approach to ICAM and C4I RMF services, Bodwé Technology Solutions LLC helps federal agencies maintain a secure environment for their data and systems while optimizing communication and information sharing.

Past Performance

The Bodwé Group has successfully and reliably completed work for multiple federal agencies across a wide spectrum of technical requirements and locations. We have the benefit of a long-term horizon and the freedom to focus on quality and building strong relationships.
