CENTRAAL STATION EINDHOVEN

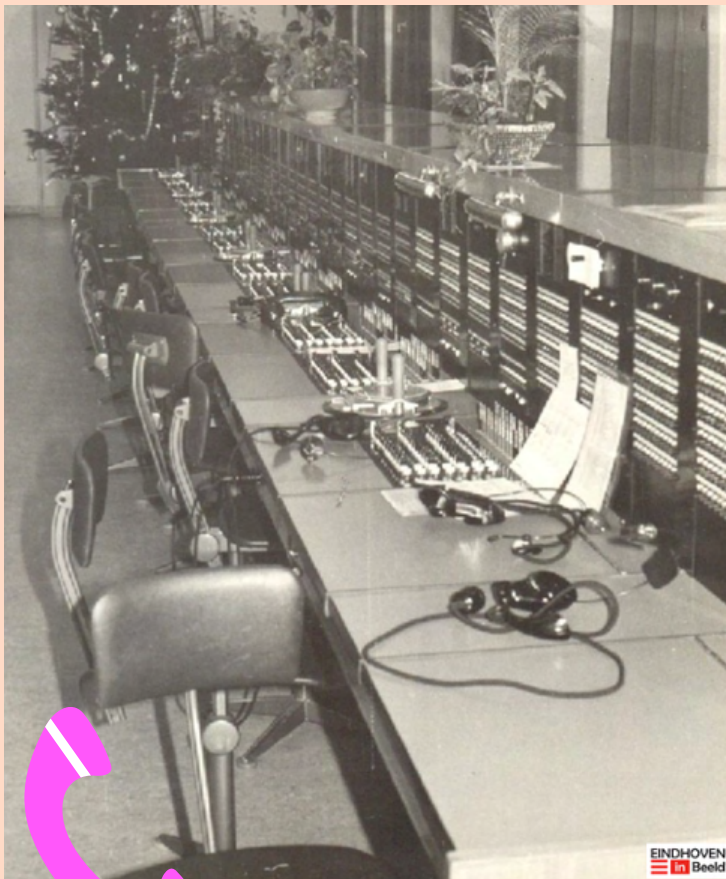

MICROLAB X DE STADSTUIN = MICROSTAD

This autumn, the successful workplace concepts of Microlab and de Stadstuin will come together in an innovative concept called Microstad. Microstad's first location will be rolled out in the heart of KnoopXL, right next to Eindhoven Central Station. Microstad will be Eindhoven's new cultural hotspot with offices, co-working spaces (including general phone booths), studios, exhibition spaces, event spaces, education, catering and various leisure activities. In short, 23,000 m² of exciting stuff!

SOME HISTORY

The Microstad building is a former KPN telephone exchange and office building. Over two floors used to be full of computers that maintained telephone connections in south-east Brabant. In early 2022, KPN left the building, which has been owned by NS Vastgoed since 2008.

MICROSTAD

To transform the building into a true Microstad, it will be made more transparent and accessible. The ground floor will be prepared for its concept-related facilities, such as a manned reception desk, a conference centre, event spaces and several catering outlets with a terrace. The inner garden will be actively involved in this with green elements.

KNOOPXL

The KnoopXL developments increases the attractiveness of Micros. Over time, the building will be surrounded by a green city boulevard. Currently, several large companies and institutions such as VGZ, Chamber of Commerce, EY, and KPMG are located in the immediate vicinity. Central station is within walking distance and by car, you can reach the motorway via the ring road or Kennedylaan within 10 minutes.
