## 2024 ENTERGY TEXAS GREEN FUTURE PRODUCT CONTENT LABEL<sup>1</sup>

Entergy Texas, Inc.'s Green Future Option is an asset based green tariff program. The program is supported by the Umbriel solar facility located in Polk County, TX. For more information, see: <a href="https://www.green-e.org/">www.green-e.org/</a>.

Green Future Option is sold such that it matches a fixed monthly percentage of your electricity usage with solar generation. In 2024, Green Future Option will be made up of the following resources.

Green-e® Energy Certified New <sup>2</sup> Renewables in Entergy Texas		Generation Location
		Generation Education
-Biomass	%	
-Geothermal	%	
-Hydroelectric <sup>3</sup>	%	
-Solar	100%	Texas
-Wind	%	
TOTAL	100%	

- 1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix.
- 2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying Entergy Texas in 2023 includes: Coal (5%), Nuclear (6%), and Natural Gas (58%). The remainder is made up through market purchases (~27%).

The average home in Entergy Texas during 2024 used 1,209 kWh per month.
