## EXPERIENCE

### **Freelance Full-stack Developer & Project Manager (Bankdata) | Sep 2022 - Present**

Developing and maintaining web applications and services as a contract full-stack developer. Java, Kubernetes.

Served as a Project Manager as part of the conversion project related to Jyske Bank's acquisition of Handelsbanken. Assumed the role of Product Owner, taking over from the previous architect.

Conducted numerous presentations within the team, both of technical and architectural nature, contributing to knowledge sharing among team members.

### **Freelance Hybrid Mobile App Developer (Anonymous Startup Customer) | Apr 2022 - Sep 2022**

Developed a hybrid mobile application using modern technologies to meet customer requirements. Ionic (Angular), Capacitor, Google Cloud

### **Freelance Full Stack Developer (Intelligent Systems) | Feb 2022 - Apr 2022**

Implemented Angular UI and functionalities, integrated a barcode scanner into the application, and customized the app using the client's Angular library. I also developed backend features with Java and Spring, trained newly hired developers on best practices, and documented implemented solutions for future maintenance.

### **Project Manager | Netcompany | 2021 - 2022**

Managed teams and stakeholders, ensuring project goals were met and Scrum processes were implemented. Collaborated with steering groups to align project outcomes with stakeholder expectations.

### **Developer & Team Lead | Netcompany | 2020 - 2021**

Developed web applications from scratch and designed microservice APIs. Mentored and trained new developers in fundamental development techniques and practices.
