SALE DAY SAFETY

Visitors are to enter bull pens at their own risk. Children under 16 years are not permitted to enter the bull pens.

All care is taken to ensure our bulls are consistently managed in a low stress environment. However, we cannot ever predict or guarantee an animal's behaviour. Sale day places abnormal pressure on our bulls with crowds of people walking around them and so the behaviour of even the quietest bull can be unpredictable. With this in mind, we ask that while inspecting sale bulls you move around them quietly and respectfully. Please do not congregate in pens and be aware of bulls fighting.

SALE DAY INFORMATION

Directions: Please note that sale day and inspections will be held at our property 'Bambi' 1953 Aberfoyle Road, Aberfoyle (next door to 'Trent Bridge'). The live auction will take place in the 'Bambi' woolshed from 1pm AEST and will be interfaced online with AuctionsPlus.

Catering: We love nothing more than bringing friends and family together for a great meal, on sale day we will have all cylinders firing with a BBQ lunch provided for all guests and complimentary tea and coffee available.

We have partnered with Andrews Meats to bring you meat from their industry leading Tajima program (F1 and Fullblood). Thanks to Jeremy and the team for helping us feed the sale day crowd.

Insurance: Bulls can be insured through ACME insurance brokers, representative Rod Butler can be contacted via 0448 108 867 and will have a stand at the sale. Alternatively please make arrangements with your preferred agency. We recommend that bulls are insured.

J-BAS: The Trent Bridge herd is J-BAS 7.

Stud Transfers: Please advise on sale day if you require bull ownership to be transferred to your AWA prefix.

Rebate: A 2.5% rebate is offered to outside agents introducing buyers prior to sale day. Client introductions must be made in writing to the vendor (via email charlie@trentbridge.com.au) 24 hours prior to the sale, and settle within 7 days.

DISCLAIMER: All reasonable care has been taken by the vendor and selling agent to ensure that the information provided in this catalogue is correct at the time of print. The vendor and selling agents make no representations about the accuracy, reliability or completeness of information provided and do not assume any responsibility for the use or interpretation of the information included in this catalogue.

We made you an app!

TRENT BRIDGE BULL FINDER 2026

Scan the QR code
to access the app

At Trent Bridge our goal is simple: give our clients genuine choice with trusted genetics and proven performance. With 150 bulls on offer this year, we know that building a short-list can take time.

That's why we've built you an app. It helps you **define your breeding objectives** and **refine a list that fits your program**.

Of course, nothing beats flicking through the catalogue (and reading ALL 150 comments...) but the app is a handy tool to make the process quicker and easier. Final weights and pen numbers will be updated in the app on sale morning, and we'll have connectivity running at the pens so you can access it on-farm.

TRENT BRIDGE WAGYU

TRENT BRIDGE WAGYU

WELCOME TO TRENT BRIDGE

Dear Wagyu Breeders,

Despite some very welcome rain in May, the start of this year was extremely challenging season-wise. After several outstanding seasons, drought arrived quickly and forced some big decisions. We early weaned all our Fullblood and F1 calves into containment feeding, sold more than 300 registered Fullblood cows, and agisted two thirds of our Angus cows. Our sincere thanks go to the Whitehead family in Winton, Queensland, and the Gay family in Boorowa, New South Wales, for taking such exceptional care of them.

What was unusual about this dry spell was how strong the cow market was. Unlike 2019, when we were almost paying processors for the honour of taking our cattle, kill cattle were worth very good money. Booking space at processors was out six to eight weeks, and saleyards saw record numbers. This is on the back of the 2025 drought in Victoria and southern New South Wales.

To me, the upshot is that a lot of Angus cows have gone out of the system, and plenty of these cattle were joined to Wagyu. On top of this, Angus and F1 feeders have traded close to parity for the past two years. When these two factors combine, the number of F1 joinings inevitably drops.

Like every agricultural market, Wagyu is ultimately driven by supply and demand, and I believe those fundamentals are turning decisively in the producers favour. One of the indicators I watch most closely is the Wagyu cattle sold through AuctionsPlus. During periods of oversupply, those cattle have consistently traded at a significant discount to cattle sold directly into established supply chains. Over recent months that discount has disappeared. We've seen outstanding results, including F1 cattle in the New England making more than \$8/kg (light cattle under 200kg). To me, that is the market signalling one thing: supply is tightening. But it's not just supply that's changed. What buyers are actually looking for has changed too.

Seven years ago, supply chains chased marbling almost to the exclusion of everything else. What we are seeing now is a more balanced brief: animals that can efficiently produce carcase weight, EMA and marble score with fewer days on feed. High-end marbling will always command a premium, but there is a growing opportunity in the marble score 6 to 7 animal with strong carcase performance. Over the last few years we have had absolute conviction that this is where the market was heading, but more importantly, we wanted to breed these more balanced animals for our own herd.

Faster growing, more maternal cattle that excel across every metric of carcase performance also make better females, forming the base of our herd. This focus has to be balanced, not one of extremes. One of the things that makes Wagyu such a great management tool in Angus programs is easing calving. In higher content Wagyu herds, their moderate frame makes them incredibly efficient cattle. It's a case of improving what's already there, rather than fundamentally changing it.

This year's draft of bulls represents the best combination of growth, marble, carcase weight and EMA that we have put together. We believe the bulls are exactly what the market is asking for, and just as importantly, will breed you more efficient and profitable calves, be it in an F1 or purebred production system. We're offering 150 bulls, including 32 two-year-olds, our largest run of two-year-olds offered to date. Many of these two-year-olds were used in our commercial herd last year.

We hope to see you at Trent Bridge on Thursday, 3rd September. If you have any questions about the bulls or would like to inspect them before sale day, please don't hesitate to get in touch.

Warm regards,

Charlie Perry On behalf of the Trent Bridge Wagyu team

OUR BREEDING PROGRAM

This year 30% of our W drop animals have made our bull sale team. What's interesting is seeing which female lines deliver a high proportion of bulls into the sale year after year.

My two favourite bulls are Trent Bridge J77 (Jack) and Q118. Both carry that rare combination of short gestation, average birth weight, and powerful growth with elite carcase weight. Alex Hammond from the highly regarded Robbins Island Wagyu has used significant numbers of both bulls and told me recently that Q118 is one of the top two bulls to ever go through their program. J77 and Q118 are the maternal grandsires for 36 of the bulls catalogued this year. Despite only 30% of the W drop making the bull team, more than 60% of the Q118 and J77 daughters made it. It's always gratifying when the daughters of our favourite sires breed on.

Throughout this catalogue we describe in detail the merit of our animals in terms of their WBVs. The reason for this is simple. In a Wagyu supply chain the value proposition is quite clear: the higher the value of the carcase, in terms of marbling, EMA, marble fineness and carcase weight, the better the outcome across the supply chain.

But in our breeding program, our first priority is to apply the foundational principles of cattle production to our herd:

- A female must go in calf, raise a calf and go back in calf
- The animals must be structurally sound with good feet
- The animals must have a good temperament

Historically, we have had a very high marbling herd. In general terms marbling and growth traits are inversely correlated. To breed for extremes in either trait is not difficult, but to have high marbling with good growth capacity and carcase traits is more challenging. Over the last five years we have made a concerted effort to maintain a very high level of marbling while also finding bulls that can provide growth, carcase weight and strong maternal features. The catalogued bulls are sitting exactly where we want them to be, with an average marble score of +2.7, an average carcase weight of +42, EMA of +9 and a 200-day weight of +18.

As detailed on pages 8 and 9, a core part of our own business is breeding commercial F1 feeders. Each animal is genomically tested with the Wagyu Feeder Check, and sire verified. This gives us the basis to collect significant amounts of data from weaning through to slaughter on their performance and profitability. This information is then incorporated into the WBVs genetic analysis and our stud breeding program to increase the breeding value accuracy and help us to continue to breed better cattle.

The recessive gene status for each animal is described in each lot and will look like this: "B3F, CHSF, CL16FU, F11F, IARSF". If you are looking to purchase a bull for a crossbreeding program (F1 to F3), the recessive gene status is not applicable, as these conditions are not prevalent in other breeds. However, if you have a purebred or fullblood herd, it is another data point to consider. We believe the genetic diversity in the Wagyu population is too small to completely discount any animal that is a carrier for a genetic condition. That said, we do seek to actively manage it. You will see across the catalogue that the majority of animals are free of all recessive genes.

Trent Bridge Wagyu Sale Bulls 2026

Marble Score

The average marble score for the bulls is +2.7 which is in the top 14% of the breed

EMA

The average EMA for the sale bulls is +9 which is in the top 15% of the breed

Carcase Weight

The average carcase weight for the sale bulls is +42 which is in the top 18% of the breed

200 Day Weight

The average 200 day weight for the sale bulls is +18 which is in the top 20% of the breed

SIRE TESTIMONIAL

ROBBINS ISLAND WAGYU ON TRENT BRIDGE Q118

On the north-west tip of Tasmania, the Hammond family operate Robbins Island Wagyu, one of the most highly regarded vertically integrated Wagyu supply chains in the country. We've been fortunate to have them buying semen from our sire team over the last few years. Recently Alex Hammond, CEO of Robbins Island Wagyu, reached out with some feedback on one of our favourite sires, Q118.

We consider Charlie, Georgia, Wal and Jen from Trent Bridge Wagyu as friends, but also feel blessed that they have given us access to their genetics over the years. It doesn't matter how much you like people, from a business perspective sires still need to be commercially profitable.

We started with TBRFJ0077 who we consider to be a very good bull for bringing profitable carcasses and producing females that milk.

J77 averages across 242 carcasses: Masterbeef marble 9.0, HSCW 461kg

Q118 progeny started coming through the feedlot 12 months ago. Once we had 20 carcasses, we were confident enough to say that he is the most profitable bull we have used in our program's history. An added benefit is that like J77 his females have fantastic milk.

He is averaging across 38 carcasses: Masterbeef marble 11.2, HSCW 465kg.

"He is the most profitable bull we have used in our program's history."

Q118 delivers nearly every time. He has only had 3 carcasses below a 9 on the Masterbeef camera. 2 were in the high 8's and were graded by the Ausmeat grader as a 9. As a result, he has produced 37 out of 38 carcasses that have paid us at the top grid price. This is massive for profitability when producing commercial carcasses.

When we delve deeper, he stands out further. 30 of his 38 carcasses have been above Masterbeef marble 10. 22 have been above Masterbeef marble 11.

We have used an additional 1000 straws over the last 12 months and plan on using a lot more into the future. Bulls like Q118 don't come around very often – he is a true outlier producing weight and marble.

COMPLETING THE FEEDBACK LOOP

Every year we sell approximately 1,000 F1 feeders; not only is our F1 Feeder program a key component of our business, it also serves as a critically important foundation for the data capture and assessment of our seedstock herd.

Every commercial F1 is genomically tested and sire verified. On top of that, we're part of a data sharing group with other breeders, and between us we're running 4,000 to 5,000 feeder checks a year on Trent Bridge genetics.

The Wagyu Feeder Check gives us an early read on an animal's genetic potential across four key traits: marble score, carcass weight, EMA and ADG. From there we can track that animal's

performance from the paddock through to the feedlot, giving us significant amounts of data on how key sire lines are performing.

The real value isn't in the tracking itself. It's what happens when the carcass data goes back into the WBV genetic analysis and the accuracy of the breeding values improves, allowing us to drive genetic progress across our entire herd.

WHAT THE 2024 DATA SHOWS

The table opposite on page 9 is an example of carcass data from 2024, showing how the breeding values shifted once results were submitted across three traits: marble score, carcass weight and EMA. The table contains the sire ident, the number of bodies slaughtered, the "old WBV" was the value before the slaughter data was submitted and the "NEW WBV" is the breeding value after the new data has been analysed.

Marble score proved incredibly stable. Across the group the average stayed at 2.1. This is despite a few individual sires that had quite a lot of movement. TBRFQ111 gained +0.5 and TBRFR600 dropped 0.4. But once you average across the whole team, marble settles back to where the original genetic potential said it would.

Carcass weight told a similar story; the group average moved from +32 to +33.4, up +1.4. Some of the swings were more significant: TBRFR600 increased +14 and TBRFQ159 gained +10, while TBRFR445 and TBRFR125 both dropped. Individual sires can move in either direction, but again the average is incredibly stable.

EMA changed from 7 to 6.7 on average. To put this in context, this is a change from the top 30% of the breed to the top 32%. Again, there was some larger individual movement. TBRFQ111 gained 2.2, TBRFN346 gained 2.4, while TBRFN185 reduced 1.8 and TBRFR600 by 2.4.

THE TAKE AWAY

Your team of bulls will, on average, conform to their own genetic potential. You'll get outliers in both directions on marble, carcass weight and EMA alike, but the group average holds pretty true to what the WBVs said it would be before a single carcass was ever assessed.

Most importantly this tells me that the WBV's are doing a good job at forecasting the genetic potential of an animal.

Just as important as identifying elite bulls and using more of them to drive our genetic progress, of equal importance is identifying those bulls that are performing below their estimated genetic potential and removing them from our programs.

NEW TO F1 WAGYU?

Historically the majority of our sale bulls have gone over Angus females and into F1 Wagyu programs. If you are entering into this market, here are a few things to consider:

Relationships: Less than 7% of F1's are bought and sold through public markets (like AuctionsPlus) the vast majority of cattle are sold directly into supply chains. If you are looking at moving into F1's for the first time, our suggestion would be to make contact with a supply chain and talk to them about your breeding plans. They may wish to discuss the type of female you will be using and will likely have specifications around the type of bulls that are suitable for their individual F1 programs.

Marbling is King: With the F1 program, the first metric to look at is the marble score WBV. Most supply chains look to have a marble score WBV average of over 1.5, though each supply chain is different.

Growth: Although marbling is critical, as a producer you still get paid on kilograms of live weight, so do consider the growth figures of the animals. The only thing to keep in mind is birth

weight. Although wagyu are smaller than other breeds, they still have the capacity to produce bigger calves – so we recommend a birth weight WBV of under 2.2 for heifers. In contrast if you are joining cows there is a lot more opportunity to push birth weight and growth figures.

A common question we get asked is around the different growth rates of F1's compared to a straight angus. Although there are a number of variables, including the growth figures of the specific wagyu bull, the average discounted growth rate is approximately 10%.

Replacement Females: Obviously we are very focussed on the bull side, but just as much attention needs to be placed on the female side of your breeding program. We recommend selecting females bred from studs with a focus on carcase traits.

YEARLING BULLS:

If you are using yearling bulls for the first time, here are a few things to consider:

- Wagyu's are naturally fertile, however, yearling bulls need to be looked after. Our recommendation is one yearling bull should not be joined to more than 30 females and consider the size of your joining paddock.
- If you are doing an AI program and then backing up with yearlings, consider more bulls, as a large number of animals coming on heat at one time can test their stamina.
- Once the season is finished bulls will often have lost quite a bit of condition, we suggest looking after them before the next joining.
- As mature bulls (24 months +), wagyus demonstrate great fertility and longevity and can normally handle around 55 to 60 females in a joining.

HEALTH CHECK AND VACCINATION SCHEDULE

All bulls have had the following treatments and will require an annual booster

- 7 in 1
- Pestigurad
- Vibriovax
- Tested negative for Pestivirus

In areas where 3-day sickness, red water disease or tick fever may be prevalent we recommend bulls be treated accordingly before entering these areas. We are happy to discuss this further with individual clients to meet their requirements.

Semen testing

All bulls are semen tested by the team from Ced Wise Artificial Breeding Services.

INTRODUCING WAGYU BREEDING VALUES (WBVS)

Farewell EBVs and hello WBVs!

Earlier this year the Australian Wagyu Association launched a new genetic evaluation service called Wagyu Breeding Values. This ended the AWA's association with ABRI and signalled a significant strategic change for the company as they in-house their own genetic evaluation service. The new evaluation seeks to better express some genetic traits which are more "Wagyu specific".

What does this mean for you? Well, not a great deal to be honest. The AWA were at pains to keep the breeding values in a similar range to the expectations and language we'd developed. By and large, most animals have similar breeding values under both evaluations.

Where the largest changes have been is around Milk and EMA. Previously the average milk EBV was 0; it's now -1.1 as a WBV. Similarly, the calculation of EMA has changed, moving the breed average from 3.2 to 4.9. The new evaluation also identified a

much stronger correlation between carcase weight and EMA – as a general rule, animals with strong carcase weight have seen a larger increase in EMA

Last year's Lot 1 was V325. He had to be withdrawn before the sale and returns this year as Lot 26. A genetic evaluation is a live tool, so each time it's run there's a chance of incremental changes. But the below is a useful example of the changes between the old EBVs and the current WBVS.

Year	Evaluation	AWA Identity	GL	BW	200D	400D	200DM	SC	cW	EMA	MS
2025	EBV	TBRF24V325	-1.4	1.9	17	31	-1	-1.1	45	6.8	2.4
2026	WBV	TBRF24V325	-1.8	1.7	18	30	-3.5	-1	49	10.8	2.6

His milk WBV has dropped from -1 to -3.5, a shift of 2.5kg. His EMA has gone the other way entirely, lifting from 6.8 to 10.8, a gain of 4cm, right in line with the carcase weight correlation detailed above. This is a long winded way of saying, the framework you have historically used for assessing bulls is still relevant.

FERTILITY AND BIRTH

Scrotal Size WBV (cm) is an indicator of male fertility regarding semen quality and quantity in Western breeds of cattle. Higher (positive) WBVs indicate higher fertility. There is also a small negative correlation (desirable) with age of puberty and fertility in female progeny. The relationship between scrotal size and fertility in Wagyu is assumed, but not proven.

Gestation Length WBV (days) is based on AI records. Lower (negative) GL WBVs indicate shorter gestation lengths which generally relate to lighter birth weights and easier calving.

Birth Weight WBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

GROWTH

200-Day Milk WBV (kg) is an estimate of an animal's milking ability. For sires, this WBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200-Day Growth WBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This WBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight WBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and dam age. This WBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight WBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This WBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

CARCASE

Carcase Weight WBV (kg) is based on abattoir carcass records and live weight measurements (particularly at 600-Day weight) and is an indicator of the genetic differences in carcass weight at the industry average slaughter age of 990 days. Larger positive values are more favourable.

Eye Muscle Area WBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 420kg dressed carcass. A higher positive WBV indicates larger eye muscle area and therefore higher retail beef yields. Ultrasound, Aus-Meat and Japanese Digital Image Camera measurements from slaughter animals contribute to this WBV.

Rump Fat WBV (mm) estimates the genetic differences in fat depth at the P8 site of a 420kg dressed carcass. A higher positive WBV indicates more subcutaneous fat and earlier maturity.

Marble Score WBV: (Aus-Meat Marble Score) is an estimate of the genetic difference in the Aus-Meat Marble Score in a 420kg carcass. Marble Score WBV utilise the Aus-Meat Marble Score on a scale of 1 to 10, where 10 is equivalent to an Aus-Meat Marble grading of 9+. Where results from the Japanese Digital Image Camera are available, marbling percentage and marbling fineness are also used to calculate Marble Score WBV as the genetic correlations between these measures are very high. Larger positive values are more favourable.

Marble Fineness WBV: (Marbling Fineness Index) estimates the genetic differences in the Marbling Fineness Index (degree of fleck of marbling fat) as measured by the Japanese Digital Image Camera. A more positive WBV indicates higher levels of marbling fineness.

WAGYU BREED OBJECT INDEXES

BreedObject \$Indexes target economic breeding objectives based on average herd and market conditions and have generally targeted the main markets within the main production systems, combining genetic information within into one WBV for each \$Index that considers production costs and realised value.

Self-Replacing Breeding Index (SRI) the self-replacing index can be used to select Fullblood bulls that will produce more profitable females when these are retained in Fullblood or Purebred herds, in addition to profitable slaughter progeny.

The SRI estimates the genetic differences between animals in terms of net profitability per cow joined for production of replacement females and slaughter steers to a carcass weight of 435kg at 32 months of age. In terms of relative economic importance, the SRI places the following emphasis on these main traits: 38.5% on marble score (MS); 13% on Residual Feed Intake (RFI) feedlot; 11% on sale liveweight (which will reflect the growth potential and therefore carcass weight of an animal); 8% on meat yield; 6% on dressing percentage and 23.5% placed on other cow and calf traits.

Breeder Feeder Index Promotes a high growth response, especially for post-weaning gain/Carcass Weight. It reduces the number of high ranking extreme high and low Birth Weight WBV sires, and delivers positive emphasis for Milk and Scrotal Size. It applies a slight negative emphasis on high Mature Cow Weight while strongly positively emphasising Carcass Weight; whilst also providing a high selection response for Marble Score.

F1 Terminal Index (F1I) The F1 Terminal Index has an increased weighting on the Marble Score WBV and can be used to select bulls to produce profitable F1 slaughter progeny where non are retained for breeding.

The F1 Index estimates the genetic differences between animals in terms of net profitability cow joined based on production of a 420kg carcass from steers and a 385kg carcass from heifers at 28 months of age. In terms of relative economic importance, the F1 Index places the following emphasis on these main traits: 68% on MS; 9% on Residual Feed Intake (RFI) feedlot; 4% on sale liveweight; 6% on meat yield; 4% on dressing percentage and 9% placed on other young animal traits and 0% on maternal traits.

ACC%	84	78	80	77	74	71	62	50	72	62	67	69	62			

NOTES: Kicking off the sale with an outstanding Olive Grove R046 son. W100 is superbly balanced across the board. He boasts serious growth; top 2% for both 200- and 400-day weight. He also sits in the top 3% for carcass weight and EMA, carries a cracking 2.7 marble score, and milk figure of +5, and one of the shortest gestation lengths in the breed (top 1%). Top 2% BFI and FTI, and top 4% F1 Index.

ACC%	84	78	79	76	74	70	61	47	72	61	67	68	62			

NOTES: Hello big bopper! W133 is one of the most powerful bulls we have bred. He boasts the best growth figures in the entire catalogue, top 1% for both 200- and 400-day weight. Add a top 4% carcass weight and one of the highest milk figures in the draft, plus he's the standout for scrotal size, sitting in the top 1% of the breed, and a short gestation (top 2%). If you are looking to add punch and maternal power to your PB herd, or see more growth in your F1's, he will do that job.

	GL (D)	BWT (KG)	200 (KG)	400 (KG)	600 (KG)	MCW (KG)	MILK (KG)	SS (CM)	CWT (KG)	EMA (SQ CM)	RUMP (MM)	MARBLE	FINENESS (%)	BFI \$	FB TI \$	F1 TI \$
WBV	-2.2	0.7	22	36	45	49	1.5	0.5	37	8.7	-2.2	2.5	0.68	490	383	336
ACC%	83	78	79	76	73	69	59	47	71	59	66	67	60			

NOTES: Closing out this opening run of yearlings, W148 is another R046 son. I really like his balance of short gestation, moderate birth weight and very strong growth. Combined with strong carcase weight and marble score of 2.5 he would offer plenty to a PB or F1 operation.

LOT 21 TRENT BRIDGE V640

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

CHAPTER ONE - PRELIMINARY

1. (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
- (b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
- (c) A buyer is bound by these terms and conditions by bidding at auction.
- (d) **Competition and Consumer Act (Cth) 2010**

It is unlawful for parties that are, or otherwise would be, in competition with each other to make, or give effect to, a contract, arrangement or understanding that contains a provision relating to:

- i. price-fixing; or
- ii. restricting outputs in the production and supply chain; or
- iii. allocating customers, suppliers or territories; or
- iv. bid-rigging; or
- v. collusive bidding.

Large fines and other sanctions may be imposed for unlawful conduct.

2. (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors and agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants, contractors and agents. The term "auctioneer" includes, so far as the law and context permits, the vendor's agent.

(b) When used in these terms the expressions "companion animals" means all animals originating from the same property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.

3. The following applies in interpreting these terms and conditions:

- (a) The following words have the following meanings:

Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent;

Livestock means animals auctioned pursuant to these terms and conditions; and

Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions

- (i) plus any Fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer; and
- (ii) plus any GST added in accordance with clause 12.

(b) These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict then the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

CHAPTER TWO - STANDARD TERMS OF SALE

4. Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.

5. The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior to the commencement of the sale and is subject to State law.
6. A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.

7. Prior to the fall of the hammer the auctioneer shall announce the last bid and receive any further bids. The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.

8. In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.

9. The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interest of the vendor and need not give reasons for doing so.

10. A bidder shall be deemed to be a principal unless, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.

11. The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the hammer:

- (a) the purchaser's name; or
- (b) the bid card number which identifies the purchaser; or
- (c) the name of the person on whose behalf the successful bid was made; and
- (d) the Property Identification Code (known as the "PIC") of destination.

12. The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and Services Tax (GST). GST shall be added after the fall of the hammer for those sales subject to GST.

13. The vendor warrants;

- (a) That the vendor has (or will have) the right to sell the livestock at the time of delivery; and
- (b) That the purchaser will obtain title on completion of the purchaser's obligations under this contract including payment.

14. If a buyer does not comply with any of these terms and conditions, which includes the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.

15. The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in an agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 20 to 23 apply.

16. No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until the purchase money is paid and any law, rule or practice to the contrary is accordingly negated as far as possible.

17. (a) Cattle sold on a live/weight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.

(b) Cattle sold on a live/weight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.

(c) All livestock other than cattle sold on a live/weight basis are at the risk and expense of the buyer upon the fall of the hammer.

18. (a) Subject to this clause the sale is complete on the fall of the hammer.

(b) The time for rejection is the time commencing at the fall of the hammer and ending at the first of:

- (i) delivery is taken by a representative of the buyer;
- (ii) departure of the animal from the purchaser's delivery pen; or
- (iii) one hour after the last animal is:
 - a. in the case of pre-sale weighing, sold; or
 - b. in the case of post-sale weighing, weighed.

(c) During the time for rejection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be reasonably observed when the animal was in the selling pen.

(d) If the purchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the vendor or sold on such terms as any buyer and the agent may agree, after the agent has disclosed the reason for rejection to that buyer.

(e) This subclause applies only to cattle which are sold in Queensland at auction for slaughter. The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, for delivery to and from the scales, to the buyer's delivery pen and onto the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This

subclause does not apply if the agent makes an announcement to that effect prior to sale.

19. (a) Subject to the right of rejection in Clause 18, all conditions and warranties expressed or implied by law are hereby excluded from the sale to the extent that the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.

(b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLS) must be made by 5:00pm on the seventh day after the fall of the hammer. No objection, requisition or claim against the vendor or agent in respect of such error or misdescription can be made after that time.

(c) Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnant tested or scanned positive shall mean and require only that a certificate in writing shall be supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner was pregnant on that date.

(d) For slaughter cattle, the agent undertakes to make every reasonable effort to ensure that any NLS cattle device number is transferred from the saleyard PIC to the purchaser's PIC on the NLS database no later than midnight on the day of the sale.

(e) For other slaughter livestock the agent undertakes to make every reasonable effort to ensure that the NLS information is transferred from the saleyard PIC to the purchaser's PIC on the NLS database no later than midnight on the day of the sale.

(f) Where livestock have a food safety or market eligibility status derived from the National Vendor Declaration (NVD) and/or the NUIS/ERP database, the agent will inform the buyers by pre-sale catalogue and/or announce the status prior to the offering of those lots.

20. If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:

- (a) does not acquire title to the livestock;
- (b) holds the livestock as bailee only for the vendor;
- (c) must act in a fiduciary capacity in its relationship with the vendor;
- (d) must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;
- (e) is responsible for the safety and well being of the livestock;
- (f) may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and
- (g) must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.

21. The purchaser agrees that:

- (a) Clause 20 creates a registrable security interest under the Personal Property Securities Act (Cth) 2009 (PPSA);
- (b) The Purchaser acknowledges the rights of the Seller (and/or the Agent if Clause 25 applies) to register a financing statement under the PPSA with respect to the security interest created by this clause;
- (c) the Livestock are collateral for the purposes of the PPSA;
- (d) to the extent permitted, the Purchaser waives any right the Purchaser has under the PPSA to receive notices; and
- (e) the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to this contract.

22. The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 20 or 21.

- 23.1. Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the debt creditor agent of the vendor at law.

- 23.2. The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.

- 23.3. When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.5 the agent is subrogated to all rights of the vendor under these terms and conditions against the buyer.

- 23.4. The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:

- (a) when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
- (b) when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether or not in the vendor's name or not) and, where title to the livestock has not passed to the agent, by selling the livestock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale.

- 23.5. The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3).

- 23.6. The vendor hereby irrevocably appoints the agent as the vendor's attorney to:

- (a) do at any time and in any manner as the agent thinks fit all acts necessary or desirable to perfect or improve the rights and interests afforded, or intended to be afforded, to the agent under these terms and conditions; and
- (b) appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.

- 23.7. These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.

- 23.8. The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:

- (a) by this clause 23, other than as it expressly provides; or
- (b) by the failure of the agent or the vendor or either of them to comply with the terms of this clause 23.

- 23.9. The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer as against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.

24. (a) The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock.

(b) In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.

(c) Regardless of whether or not a sale has occurred the agent may, but is not under obligation so to do, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.

25. (a) The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of

engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the saleyards and the surrounding environments.

- (b) The vendor, the agent and the buyer agree to comply with their several duties under the Australian Animal Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and handle livestock in accordance with any other or additional requirements of animal welfare legislation specific to the jurisdiction in which livestock are consigned, managed, received, transported and handled in the course of the auction process.

CHAPTER THREE - VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION

26. This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.

27. The warranty of a vendor is that livestock and their companion animals offered for sale at auction:

- (a) pass government and other regulatory authority requirements and inspections at the time of slaughter;
- (b) are of merchantable quality;
- (c) carry an NLS device in accordance with State law;
- (d) in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in any document, the livestock will have those characteristics or will be fit for the particular purpose or market; and
- (e) all information in any document provided by the vendor is true, complete and correct in all material respects.

28. In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which the breach applies.

29. However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the livestock at their next highest and best use.

30. In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.

31. Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor warranty terms, then:

- (a) the buyer will be entitled to delay payment for the price of all livestock in that lot only; or
- (b) the vendor has the option, at the vendor's cost, of collecting the companion animals, if allowed by law; or of having the livestock slaughtered in which event the risk of further condemnations will be on the vendor. Where product integrity is potentially jeopardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.

32. The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:

- (a) any error, by the auctioneer, of transcription of information from the NVD completed by the vendor to the pre-sale catalogue or the buyers post-sale summary;
- (b) any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
- (c) any failure by the auctioneer to announce prior to bidding, or disclose in the pre-sale catalogue, that the vendor has failed to provide a NVD that is complete in all material aspects.

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

33. This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells cattle to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.

34. Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by government. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the relevant government certificate, existed prior to the fall of the hammer.

35. A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.

36. Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:

- (a) a certificate is issued by government which states the relevant NLS RFID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
- (b) the certificate is received by the selling agent either in its original form or by fax or electronic communication in the form of data, text or imaging by 5:00pm on the 7th day after the fall of the hammer; and
- (c) if the condemnation is due to chemical residue the certificate follows testing in a government approved laboratory which establishes maximum residue limits in excess of the Australian limit.

37. Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of bruising, fever, partial condemnation or emaciation.

CHAPTER FIVE - NOTICES REQUIRED BY LEGISLATION

NSW Property, Stock and Business Agents Act 2002 Warnings

Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

- (i) to abstain from bidding; or
- (ii) to bid to a limited extent only; or
- (iii) to do any other act that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer detects and precisely announces that fact prior to the sale.

Tasmania Legislation. An auctioneer conducting a public auction must not appear to acknowledge the making of a bid if no bid was made. A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid except to a limited extent or do any other thing which may prevent free and open competition.

WA Auction Sales Act 1973 s31 NOTICE

It is an offence to:

- (i) induce or attempt to induce another person to abstain from bidding by means of a promise, expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;
- (ii) abstain or agree to abstain from bidding as a result of such a promise;
- (iii) knowingly enter or permit or cause to be entered in the auctioneer's record any name other than that of the actual successful bidder;
- (iv) enter in the auctioneer's record the name of the buyer other than that of the actual successful bidder; or
- (v) in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted.

The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more than three bids.
