

Succeeding with Projects

How You will Benefit

Participants

- Experience project management first hand, and learn by doing.
- Increase their project's potential by learning how to use project management tools and apply techniques.
- Learn to leverage critical teamwork techniques to get their project team working together.
- Earn the respect of their Project Sponsor and stakeholders.
- Utilize project management tools and leave with templates.

Organization

- Build a common understanding of project process, terminology and techniques.
- Develop valuable skill in participants because they will actually apply what they learn in class - easing their leap to apply on their project after training.
- Build relationships between participants that can be leveraged as an on-going project management cohort post workshop.

Who Should Attend

- Individuals challenged to lead a project team.
- Project Managers wanting to sharpen their skills.
- Project Sponsors wanting to understand the project management process.

Description

Participants will be immersed in a believable and recognizable world of Programs and Projects. Working with a small team, and competing with other teams, they'll navigate through project situations while applying essential project management concepts, tools, and techniques.

Whether a first-time project leader or an experienced Project Manager - Succeeding with Projects will move the needle on participant's project management skills.

During this 3-day workshop, participants will experience a project from initiation through close while entrenched in the people and project challenges they are sure to encounter on their real projects.

All material is based on the Project Management Institute (PMI) standard.

Key Topics

- Project roles and responsibilities
- Project management vs. project methodology
- Project Stakeholders, Charters, Scope, Schedule, Budget, Communication, and Risk.
- Building a High Performing Project Team
- Initiating, planning, executing, monitoring & controlling, and closing projects.
