METALUXE®

Item Availability

The METALUXE® zipper is a type of VISLON® zipper that features a metal zipper-like element shape and offers lightweight performance due to its plastic material. In addition to metallic and shiny colors, element colors are also available in the full range of YKK global colors.

METALUXE® with Matte Standard Color Elements

Matte CODE : VYUD

METALUXE® with Standard Color Elements

Shiny CODE : VY

- The colors shown here are for reference only. More colors are available in DTM colors and YKK Global Colors.
- Please note that the photo images may not look exactly the same as the actual items due to various factors, including display settings and the color capability of printing.

Instructions for use

- The slider locking and attachment strength of individual teeth is lower than size 3, 5, 8 VISLON® zippers.
- Do not use this product for luggage or boots.
- This product is not for reversible use.
- Do not subject this product to heavy loads. This may result in a loss of zipper strength and, in some circumstances, cause breakage. Ensure this product is completely closed when placing it into a washing or drying machine.
- Partially closed zippers may become entangled with other items, resulting in damage to the teeth, slider, or other items.
